CONTENTS

PREFACE

This form is designed to help 3Com NBX partners gather information that they can use to plan the installation of the 3Com NBX® SuperStack® 3 Networked Telephony Solution and the 3Com® NBX 100 Communications System. Completing this form may spur questions that enable you and your client to configure the system in the most useful manner for the client. In addition, you can use the completed form as a record for you and the client.

Distribution Medium

This guide is available in both Microsoft Word and PDF format on the *NBX Resource Pack CD*. The free Adobe® Acrobat® Reader for reading the PDF file is on the *NBX Resource Pack CD*.

Comments

Please send your comments about this guide or any of the 3Com NBX documentation and Help systems to:

Carrier Information

Local Service
Carrier:
Contact Name:
Telephone Number:
Fax Number:
Billing Number:
Any additional lines being added? Yes ☐ No ☐
Types of lines being added: Loop start ☐ ☐ T1/PRI ☐ E1/PRI ☐ BRI-S/T ☐
New PSTN connection installation date:

Long-distance Service
Carrier:
Contact Name:
Telephone Number:
Fax Number:
Account Number:

Preliminary Information

Number of telephones installed on current telephone system:
Number of telephones being installed on the NBX system:
Number of users anticipated in the near future:
Number of chassis: ☐ NBX 100 ☐ SuperStack 3 NBX
Where will the NBX chassis be located?
How will it be mounted? Wall ☐ Rack ☐
Mode: Key system? ☐ Hybrid/PBX? ☐
Will disk mirroring be installed (SuperStack 3 NBX only)? Yes ☐ No ☐
What range of extensions would you like? (NBX 100 default: 100-449 / SuperStack 3 default: 1000-4999)
Extension that will be assigned to the attendant's telephone:
Power Failure Telephone (PFT) units to be installed? (North America only) Yes ☐ No ☐
Number of PFTs:
UPS available for chassis? (UPS is recommended) Yes ☐ No ☐ Dedicated power outlet available for UPS? Yes ☐ No ☐
Will Ethernet power be used for the telephones? Yes ☐ No ☐ Number of 802.3af-compliant Ethernet power supplies: Number of non-802.3af-compliant Ethernet power supplies (may require the use of a splitter (3C10223) for each powered device):
Will a redundant power supply be used (SuperStack 3 NBX only)? Yes ☐ No ☐ **Note:** One dedicated power outlet is required for each power supply.
Attach a list of frequently dialed telephone numbers for System Speed Dials.

Site Survey

Cable Survey					
Plenum ☐ PVC ☐					Termination:
Data cable: cat./level:	Singles	Dual	Quad		110 ☐
Voice-only cable: cat./level:	Singles	Dual	Quad		Patch ☐
Total number of locations/drops:	Singles	Dual	Quad		66 ☐ Other:
Riser cable: Plenum ☐ PVC ☐ Shielded ☐					
Copper ☐	Number of pairs:			Length:	
Fiber ☐	Armored ☐ Number of strands:			Length:	
Coax ☐	Type:			Length:	
Demarcation for dial tone:					
Feeder: existing ☐ new ☐ Plenum ☐ PVC ☐ Number of pairs: Termination block? Yes ☐ No ☐ Modular jack ☐ RJ-21x (66) ☐ 110 block ☐					
Location of IDFS:					
Drop ceiling height:	Walls:		Number of floors:		

LAN/WAN Survey

Do you have IP networking/Internet access? Yes ☐ No ☐
Fixed IP address to be assigned to the NCP: (Default: 192.168.1.190)
Default Gateway: (Default: 0.0.0.0)
Subnet Mask: (Default: 255.255.255.0)
Host Name: (Default: nbx100/750)
Will you require T-connectors with terminators for additional chassis? Yes ☐ No ☐
Type of Ethernet LAN: 10BASE-T ☐ 100BASE-T ☐
Protocols used on network: IP ☐ IPX ☐ AppleTalk ☐
Do hubs have 10BASE2 connectors? Yes ☐ No ☐
Does your network distribute power over the Ethernet cables (PoE)? Yes ☐ No ☐
If you have Power over Ethernet, is it compliant with the IEEE 802.3af specification? Yes ☐ No ☐
Does your network meet 5-4-3 Ethernet specifications today?
ISP name:
ISP telephone number:
Typical LAN bandwidth utilization:
Will more hub/switch ports be needed? Yes ☐ No ☐ If yes, how many:
Location of phones within the network:
Note: Attach a current network diagram to enable you to connect the NBX phones so that there is minimal impact on the data network.

Telephone Line Survey

Number of CO (POTS) lines (North America only):
Fax lines:
Modem lines:
Alarm lines:
Other:
ANI? Yes ☐ No ☐

DNIS? (North America only)	Yes ☐ No ☐
DID/DDI?	Yes ☐ No ☐
911/E911? (North America only)	Yes ☐ No ☐
Caller ID?	Yes ☐ No ☐
D4 Channel Bank? (North America only)	Yes ☐ No ☐

No. of T1/DS1 lines:
No. of T1/ISDN PRI lines:
No. of E1/ISDN PRI lines (outside North America only):
No. of ISDN BRI-S/T lines (outside North America only):
Other:
Other:

Electrical Survey

Sufficient power outlets for all telephones and chassis?				Yes ☐	No ☐	
Sufficient amperage?				Yes ☐	No ☐	
Outlet fully grounded or switched?	Outlet 1	Yes ☐	No ☐	Outlet 2	Yes ☐	No ☐
Dedicated power outlet available for redundant power?				Yes ☐	No ☐	

NBX Hardware Required to Complete the Installation
Line cards:
Hubs:
Chassis:

Digital Line Card Provisioning – T1 DS1 and T1 ISDN PRI

Service Provider Value/Service	**T1 DS1**	**T1 ISDN PRI**
Line length (the physical line length)	0-35 ☐ 25-56 ☐ 55-95 ☐ 85-125 ☐ 115-155 ☐ 145-185 ☐ 175-210 ☐	0-35 ☐ 25-56 ☐ 55-95 ☐ 85-125 ☐ 115-155 ☐ 145-185 ☐ 175-210 ☐
Note: Some line length ranges overlap. If neither range is more representative of the length, use either range. Otherwise, use the range with the greatest overlap.		
Framing type	D4* ☐ CSU ESF to D4 conversion ☐ *Recommended/default (Required for ANI)	ESF* ☐ F4 ☐ F12 (D4/SF) ☐ F72 (SLC96) ☐ *Recommended/default
Line code (zero code suppression)	AMI ☐ CSU B8ZS to AMI Conversion ☐	B8ZS ☐ (recommended) AMI ☐
CSU installed? **Note:** The 3Com 3C10165D E1 Digital Line Card and the 3C10116D T1 Digital Line Card each have an onboard CSU.	Yes ☐ No ☐ If No, planned installation date: _____ A CSU is required for both T1 DS1 and T1 ISDN PRI installations.	Yes ☐ No ☐ If No, planned installation date: _____ A CSU is required for both T1 DS1 and T1 PRI installations.
Timing mode	Loop/Internal	N/A
DID/DDI/DNIS Services MSN (Multiple Subscriber Numbering) Services	NBX 100: 3-digit extensions 100-449? Yes ☐ No ☐ SuperStack 3 NBX: 4-digit extensions 1000-3999 Yes ☐ No ☐ If No, extension block available: _____ If the CO cannot provide these extensions for DID/DNIS, dial plan modifications are required. See the *Administrator's Guide*.	
Service being used	DID/DDI/DNIS ☐ MSN ☐	DID/DDI/DNIS ☐ MSN ☐
Signaling	In-band; standard TDM (Time Division Multiplexed)	ISDN PRI

Digital Line Card Provisioning – T1 DS1 and T1 ISDN PRI, continued

Service Provider Value/Service	T1 DS1	T1 ISDN PRI
Start type	All channels must be configured for Wink Start for inbound and outbound calls.	N/A
Caller ID	ANI (Calling Party IE) provided? Yes ☐ No ☐ (required for caller ID)	ANI (Calling Party IE) provided? Yes ☐ No ☐ (required for caller ID)
Line hunting	Available? Yes ☐ No ☐ Starting on channel _____ 3Com recommends starting on channel 1 and hunting up.	
CO switch protocol	E&M robbed bit	4ESS Custom ____ Call-By-Call Service Enabled Yes ☐ No ☐ Carrier Identification Code _____ Default Outbound Service: Standard ____ MEGACOM ____ 5ESS Custom ____ DMS Custom ____ National ISDN NI-1/NI-2 _____

Digital Line Card Provisioning – E1 ISDN PRI and ISDN BRI-ST

Service Provider Value/Service	E1 ISDN PRI	ISDN BRI-S/T
Line length (the physical line length)	0-35 ☐ 25-56 ☐ 55-95 ☐ 85-125 ☐ 115-155 ☐ 145-185 ☐ 175-210 ☐	0-35 ☐ 25-56 ☐ 55-95 ☐ 85-125 ☐ 115-155 ☐ 145-185 ☐ 175-210 ☐
Note: Some line length ranges overlap. If neither range is more representative of the length, use either range. Otherwise, use the range with the greatest overlap.		
Terminal endpoint identifier	N/A	☐ Automatically assign TEI ☐ Use this TEI: _____
Framing type	Multiframe with CRC4 ☐ Double Frame ☐	N/A
Line code (zero code suppression)	B8ZS ☐ HDB3 ☐	N/A
DID/DDI/DNIS Services MSN (Multiple Subscriber Numbering) Services	NBX 100: 3-digit extensions 100-449? Yes ☐ No ☐ SuperStack 3 NBX: 4-digit extensions 1000-3999? Yes ☐ No ☐ If No, extension block available: _____ If the CO cannot provide these extensions for DID/DNIS, dial plan modifications are required.	
Service being used	DID/DDI/DNIS☐ MSN ☐	DID/DDI/DNIS☐ MSN ☐
Signaling	ISDN PRI	ISDN BRI-S/T interface type
Multipoint Mode	N/A	Yes ☐ No ☐ If Yes, list other devices to be attached.
Caller ID	ANI (Calling Party ID) provided? Yes ☐ No ☐ Required for Caller ID	ANI (Calling Party ID) provided? Yes ☐ No ☐ Required for Caller ID
Calling Line Identification (CLI)	Yes ☐ No ☐	Yes ☐ No ☐
Calling Line Restriction (CLIR)	Yes ☐ No ☐	Yes ☐ No ☐
Line Hunting	Available? Yes ☐ No ☐ Starting on channel _____ 3Com recommends starting on channel 1 and hunting up.	
CO Switch Protocol	ETSI	ETSI

Dial Plan

Extension Ranges		
Default Extension Range		**New Extension Range**
Telephones	**NBX 100:** 100-449 **SuperStack 3 NBX:** 1000-3999	
Call Park	**NBX 100:** 601-609 **SuperStack 3 NBX:** 6000-6099	
Auto Attendant	**NBX 100:** 500, 501, 500-599 **SuperStack 3 NBX:** 500, 501, 5500-5599	
Hunt Groups	**NBX 100:** 450-499 **SuperStack 3 NBX:** 4000-4099	
External	**NBX 100:** 600-799 **SuperStack 3 NBX:** 6000-7999	
Paging	**NBX 100:** 620, 621, and 622 **SuperStack 3 NBX:** 6200, 6201, and 6202	

Notes:

- The extensions used for Call Park must be included in the External range. If they are not, the Park features do not work.
- Do not change the reserved Auto Attendant extension numbers 500 and 501.
- TAPI Route Point extensions are within the extension range for telephones.
- See the Dial Plan chapter in the *Administrator's Guide* for more information.
- The NBX 100 uses a default 3-digit dial plan. If you decide to import any 4-digit dial plan, you must manually modify any extension ranges not updated by the imported dial plan.
- The SuperStack 3 NBX uses a default 4-digit dial plan. If you decide to import any 3-digit dial plan, you must manually modify any extension ranges not updated by the imported dial plan.
