Step 1 Preparing the Camera

Step 2 Shooting

1. Turn on the power.

Hold the ON/OFF button down until the indicator next to the viewfinder starts blinking green.

2. Turn the mode switch to 🗖 (shooting) and set the mode dial to (MTD).

3. Set the date and time. (first time the camera is powered on) Use the left or right button to select the items you wish to set, and use the up or down button to change the value. To put the settings into effect, press the **SET** button.

4. Focus.

Point the camera in the direction of the subject you wish to shoot and press the shutter button halfway. The camera beeps twice when the subject is in focus.

5. Shoot.

Press the shutter button fully. The shutter sound will sound once when the shot has been taken. The recorded image is displayed on the LCD monitor for approximately 2 seconds.

Turn off the power.

Press the ON/OFF button. Even if you do not press the ON/OFF button, the power will automatically shut down 3 minutes after the last control is accessed.

Step 3 Reviewing an Image

1. Turn on the power.

Hold the ON/OFF button down until the indicator next to the viewfinder starts blinking green.

- **2.** Set the mode switch to ► (Replay). The last recorded image appears in LCD monitor.
- **3. View the images.** Use the left or right button to display the image you wish to see.

To Delete an Unwanted Image

1. Select the unwanted image using the left or right button and press the ⁽⁽/₂) button.

2. When the confirmation screen appears, check that [Erase] is selected and press the **SET** button.

Select [Cancel] using the left or right button to cancel without erasing.

Continued on the reverse side.

Downloading Images to a Computer

Do not connect the camera to the computer before the software is ins Follow each step below in order.

List of Things to Prepare

- Camera and computer
- Canon Digital Camera Solution Disk provided with the camera
- USB cable (use the cable provided with the camera)

talled.	 4. Connect the camera to the computer using the USB cable. Set the mode switch to read turn on the camera's power. 	 Mac OS X (10.1/10.2): If Image Capture or iPhoto are running, click on in the uppe window to close the application. Double-click the [Canon ImageBrowser] icon on the desktop.
	<i>5.</i> Start the program.	Mac OS 9.0-9.2: ImageBrowser will start and open the ImageBrowizard.
k in	• Windows*: The Events dialog will automatically display.	ImageBrowser Automation wizard Camera or memory card has been detected. Please select an action from the following. Display Images Download images (You can set the detailed settings in the dialogs that follow.) Save to: Change Macintosh HDE:Documents:05_05_2002 Launch RemoteCapture
eution	Always use this program for this action	Confirm that [Display Images] is selected and click the [OK] buttor 6. Download images to the computer using the program y
	 Select [Canon ZoomBrowser EX] and click [OK]. * If the above dialog (Events dialog) does not appear automatically, double-click the [ZoomBrowser EX] icon on the desktop. 	For details on downloading images, see the <i>Software Starter Guide</i> inclupackage.

Printing with a Direct Print Compatible Printer (CP Series)

It is easy to print out crisp prints of the images you shoot by connecting your camera directly to a separately sold, direct print compatible printer (CP series) with a cable. For details, please see the user guide for the printer.

You can also print with a separately sold, direct print compatible Bubble Jet printer. For details, please see the user guide included with the Bubble Jet printer.

1. Load the ink cassette and the paper cassette into the printer.

2. Connect the power cord to the printer. With the CP-10 printer, the printer's power turns on automatically.

- 3. Connect the camera to the printer and press the printer's ON/OFF button to turn on the power. Set the camera to Replay mode and turn on the power.
 - I appears on the camera's LCD monitor.
 - If you cannot use the camera's compact power adapter*, please use a fully charged NiMH batteries.
