KEY FEATURES

- FST PURE® Flat Picture Tube
- Cinema Mode (3:2 Pulldown Switch)
- Dynamic Quadruple Focus
- DFine[™] Advanced High Speed Velocity Scan Modulation

- · Double Baffle Speaker System
- CYCLONE® Subwoofer System
- SRS® WOW
- StableSound[®]

- Direct Video Input Selection
- QuickConnect[™] Guide
- Front Panel AVS Inputs
- DVI-HDTV Input

ADVANTAGE TOSHIBA

- 34" Widescreen HD Compatible FST PURE® flat tube eliminates unwanted reflections from room light compared to conventional tubes designs and increases viewing angle
- Invar Shadow Mask enhances color reproduction thanks to its nickel-alloy construction, making it more heat resistant than conventional iron masks
- CrystalScan HDSC[™] upconverts all video signals (including 480i/p) to 1080i HD. This results in a significant reduction in jagged-line artifacts which produces a smoother, more natural image. Selectable 540p, for users who want to display a progressive scan image from a progressive scan source, is available via the on-screen menu
- Auto Aspect Detection senses when an interlaced DVD player is sending a 16:9 signal and automatically switches
 the set to Full mode
- 3D Y/C Digital Comb Filter with Vertical Contour Correction provides more accurate processing of RF and composite video signals for a sharper, cleaner picture This advanced Comb Filter significantly reduces detail noise, seen as shimmering or flicker, in complex or intricately detailed scenes.

TECHNOLOGY & BENEFITS

VIDEO

- FST PURE® Fine Pitch Flat Picture Tube This "purely flat"
 picture tube delivers increased viewing angle along with the
 enhanced picture linearity necessary to produce accurate
 life-like images.
- Cinema Mode (3:2 Pulldown Switch) This circuitry identifies original film based content from DVDs, it then reassembles the frame sequence to more accurately reproduce the original 24 frame film-based material. This process eliminates artifacts and results in sharp, accurate full-frame progressive images.
- Dynamic Quadruple Focus produces clear legible text and graphics around the outside of the screen thanks to improved edge and corner focus
- DFine[™] High Speed VSM increases the scanning speed to create sharp, well-defined images which results in greater detail.

AUDIO

- Double Baffle Speaker System Provides improved stereo sound reproduction without connecting additional speakers.
- CYCLONE® Subwoofer System complements the TV's other 2 speakers with additional low bass sounds. The result is full home theater sound without the addition of any external speakers.

- SRS® WOW Combines SRS® 3D (creates a wide three-dimensional sound field), TruBass (boosts bass frequency perception for more dramatic low frequency effects), and Focus (raises the sound image vertically to create clearer voices) which enhances the Home Theater experience.
- StableSound® Maintains television volume within a preset range regardless of the source signal

CONVENIENCE

- Direct Video Input Selection Inputs can now be directly selected from the remote's numbered keypad without scrolling through all the inputs.
- QuickConnect™ Guide acts as a set-up wizard helping the consumer in connecting the antenna or cable box and with performing initial channel scan and other basic set-up functions.
- Front Panel A/V/S Input for easy connection of video games or a camcorder
- DVI-HDTV input allows for a true uncompressed digital video connection
