2706 Caller ID

Technically advanced with a stylish, compact design, the **STARPLUS 2700 Series** is the ideal choice for today's business or hospitality environment. Whether you are a hotel, university or business office, one of the six **STARPLUS 2700** telephone models is sure to meet your needs. Adding phones to your current system is a snap with **STARPLUS 2700** telephones because they are compatible with nearly any PBX, key telephone system, or Centrex service.

The 2706 Caller ID phone includes all the standard features of the 2700 Series, plus an additional 4 line by 16 character LCD for easy viewing of caller ID information. The 2706 will store the names and numbers of up to 100 answered or unanswered calls when Caller ID is used. When Caller ID is not used, the display shows the current date and time.

The Affordable One and Two Line Telephone Solution

All the Features You Need

All six 2700 models are FCC registered as well as hearing aid and American Disability Act (ADA) compliant. Common features include handset volume button, right side data jack, message waiting light, redial button, flash button, desk/wall mount, and ringer control switch.

Special Features for Hospitality Models

The 2702 and 2704 models in the series are specifically designed for hotels, motels, and resorts. Special features added for the hospitality models include a hidden programmable feature button located under the overlay which reduces guests access to programming, and a hi/lo ringer switch that eliminates the ability to permanently turn off the phone's ringer.
