# System Planner

---

Date \_\_\_\_\_

Name \_\_\_\_\_

Address \_\_\_\_\_

Phone \_\_\_\_\_

DOSS Order No. \_\_\_\_\_

The information you supply on the enclosed forms will enable your AT&T Service Technician to install your new MERLIN Plus Communications System so that it works exactly as you want. It is important that you provide this information *prior to installation*. In addition to installing your system, the Service Technician will train someone from your company to use it, so you *must* have someone present during the installation.

What is the name and phone number of the person who will be present when your system is installed?

Name \_\_\_\_\_ Phone \_\_\_\_\_

Fill out the attached System Planner Configuration Form, including the Voice Terminal Assignment section, using the following guidelines:

## DIAL SIGNALS

Under **Dial Signals**, check one of the following:

- Touch-Tone —if *all* of your telephone lines are Touch-Tone lines
- Rotary (Pulse) —if one or more of the lines are rotary-only lines

## LONG DISTANCE DIALING

Under **Long Distance Dialing** check one of the following:

- Toll-Prefix —if you have to dial a 1 or 0 before the area code when making a long distance call
- Area Code Only —if you don't have to dial a 1 or 0 before the area code

## TRANSFER RETURN INTERVAL

Under **Transfer Return Interval**, check one of the following:

- No Return —if you don't want transferred calls returned to the originator
- \_\_\_\_ Rings —if you want transferred calls to return after more or less than four rings which is the default (fill in the blank with the appropriate number —up to nine rings)

## CALL REPORT

Under **Call Report**, complete the following if you have the optional data collector and printer:

- Put a check mark in the box next to Outgoing Calls Only if you want to record only outgoing calls.
- Put a check mark in the box next to Incoming and Outgoing Calls if you want to record both incoming and outgoing calls.

- For either selection above, fill in the Minimum Duration of a call (0 through 9 minutes) before it is recorded. If 0 is selected, calls will be recorded after ten seconds.

MUSIC-ON-HOLD

Under **Music-on-Hold**, put a check mark next to the appropriate music volume to adjust the volume through administration, if you have an optional audio source connected to the Music-on-Hold jack.

BACKGROUND MUSIC

Under **Background Music**, put a check mark next to the appropriate music volume to adjust the volume through administration, if you have an optional audio source and an optional loudspeaker paging system.

OUTSIDE TELEPHONE LINES

Under **Outside Telephone Lines**, enter the *telephone number* and *line type* for each of your outside lines. For example, enter “CO” (for Central Office) for regular lines, “FX” for a Foreign Exchange line, etc.

AUTOMATIC SYSTEM ACCESS

Under **ASA Line Assignments**, follow the instructions below if you are planning to use any of the ASA features—Call Forwarding Direct Extension, Dialing Remote Line Access, or System Answer.

- Enter an “I” for the line(s) in the incoming line group for each ASA feature you are using.
- If you entered an “I” for an incoming Call Forwarding line, you must also enter an “O” for the line in the outgoing Call Forwarding line group.
- For each ASA feature you’ve selected, specify the number of rings (0 through 9) you want before the call is answered by the feature. If 0 is selected, calls will be answered immediately.

VOICE TERMINAL ASSIGNMENTS

Under **Voice Terminal Assignments**:

- Write in the *name* of the system attendant and the attendant’s *location* next to Intercom (Icom No.) Number 10.
- Next to the remaining intercom numbers (11-29); write in the *names* and *work locations* of the people who will have MERLIN system voice terminals. (See NOTE.) Also, indicate the *type* of voice terminal (5-, 10-, 22-, or 34-Button) each person is assigned.

**NOTE:** If you will be using any of the Automatic System Access (ASA) features, write ASA next to Icom. No. 18. If you will be using the Busy Buster and/or the Call Report Feature, write BB/Reports next to Icom. No. 19.

- For each *line* (A-H) associated with each intercom number, indicate whether it will be button free, that is, the incoming line will ring at the voice terminal but will not have a button associated with it. If a voice terminal will have button free line assignments, write in the abbreviation for the ringing option you want:

R = the line will ring at that telephone  
N = the line won’t ring

---

Draw a circle around the ringing option you've selected for the button free line assignments. Now for the remaining lines to be assigned to buttons on the voice terminals, use the following abbreviations for the ringing options:

- R = the line rings immediately
- N = the line won't ring
- D = the line rings after a delay

Any ringing options circled on the form must be administered for Button-Free Line Operation.

- For *Automatic Line Selection Sequence*, enter the line letters assigned to each telephone in the order that they will be selected by that telephone. See the example, where the President wants line C, a private line to be selected first, and also wants access to all of the other lines. The entry is C, A, B, D.

## CALL RESTRICTIONS

Under **Call Restrictions**, indicate the type of call restriction, if any, for each voice terminal in the system:

- Disallowed List** Voice terminals that have a Disallowed list assigned to them cannot make specified calls. Follow the directions to complete the Disallowed List Entry Form under "Call Restrictions, Disallowed List, and Allowed List Entry Form." Then, put a check mark next to each voice terminal you're assigning the Disallowed list.
- Unrestricted** Unrestricted voice terminals are able to make any kind of outside call. Put a check mark next to each voice terminal that is able to make unlimited outside calls.
- Toll Restricted** Toll Restricted voice terminals are able to make local but not long distance calls. Put a check mark next to each voice terminal that can make local calls but not long distance calls.
- Outward Restricted** An Outward Restricted voice terminal cannot make any outside calls. Put a check mark next to each voice terminal that cannot make any outside calls.
- Allowed List** Assigning Allowed Lists to voice terminals permits them to make specified calls regardless of restrictions placed upon them. Follow the directions to complete the Allowed List Entry Form under "Call Restrictions, Disallowed List, and Allowed List Entry Form." Then, enter the allowed list number(s) for each restricted voice terminal that you want to be able to make specific calls.

---

## PAGING GROUPS

Under **Paging Groups**, check the appropriate column(s) to indicate which paging group (Group 1 or Group 2) each person will be assigned.

**NOTE:** This is a MERLIN Plus system feature and does *not* require any additional equipment. Your MERLIN Plus system comes with the first ten positions (Icom Nos. 10-19) assigned to Group 1 and the second ten positions (Icom Nos. 20-29) assigned to Group 2.

## VOICE TERMINAL ASSIGNMENT FORMS

There are two choices given under **Voice Terminal Assignment Forms**. Put a check mark in the *Templates Form* column if you're assigning one of the four preprogrammed templates (see page 9 and 10) to the voice terminal. Place a check mark in the *Custom Form* column if you are custom-designing a template for the voice terminal.

- **Voice Terminal Template Assignment Form:** In the space provided next to the appropriate preprogrammed voice terminal template on page 9 or 10, write the intercom number of each voice terminal to which that template applies.
- **Voice Terminal Custom Assignment Form:** Be sure you have enough copies of the different sizes of voice terminal forms. Make as many photocopies of page 11 as necessary. For each voice terminal that is to have customized assignments, choose the form showing a matching number of buttons (5, 10, 22, or 34). Write the intercom number in the space provided on the form; then write on the button illustrations the names of the features you want to assign to the feature buttons on each of these voice terminals.

## PROGRAM MODE LOCK

Under **Program Mode Lock**, put a check mark next to any voice terminal that you want to prevent individuals from reprogramming.

## PARTIAL SYSTEM SPEED DIAL FORM

On the **Partial System Speed Dial Form**, write in the appropriate information:

- Enter the *numbers* (telephone or account) and the *names* for the numbers that you will want the people in your system to be able to dial using an abbreviated code. Put a check mark in either the *telephone* or *account* number column to indicate whether the number you've listed is a telephone number or an account number.

**NOTE:** It may be useful to assign telephone numbers to the two-digit codes (60 through 89) and account numbers to the three-digit codes (900 through 999) or vice versa.

- Check the Private box if you do *not* want the number to appear on Call Reports and on voice terminal displays. Private numbers, however, do appear on System Feature Reports.
- Check the Restriction override box if people who are normally restricted from making outside calls should be able to dial these numbers.

## CALL RESTRICTIONS, DISALLOWED LIST, AND ALLOWED LIST ENTRY FORM

You can use Call Restrictions to prevent outside calls (both local and long distance) from being made from some or all voice terminals. You can use the Disallowed List to prevent billable calls being made from some or all of the voice terminals in the system to numbers with the 900 area code, the 976 exchange, or other numbers as desired.

---

Using Allowed Lists and System Speed Dial codes you can permit calls from call restricted voice terminals to specific telephone numbers, local exchanges, or area codes. By combining Call Restrictions with selected exceptions, you can control outgoing call traffic and associated costs without placing unreasonable restraints on the people in the business.

Under “Number” on the **Disallowed List Entry Form** enter billable numbers, area codes, etc., that you want to disallow.

**NOTE:** For example, to disallow calls to the 900 area code, enter the following on the list:

1900

In the space provided next to “List 01” on the **Allowed List Entry Form**, write in the name, if any, that you want to use to identify the list, such as “Emergency Numbers” or “California Suppliers.” Then, under “Number,” write the area codes, local exchanges, emergency numbers or other telephone numbers that are appropriate for that list. According to the needs of the business, name and add numbers to other allowed lists in a similar fashion.

KEY TO FEATURE  
ABBREVIATIONS

The following table identifies the abbreviations used for the voice terminal template labels and forms. For more information about each of these features, refer to Section 5, “Reference,” in the *MERLIN Plus System Manual*.

<b>Abbreviation</b>	<b>Feature</b>
AI	Auto Intercom
BB	Busy Buster
CF	Call Forwarding
CP10	Call Pickup Intercom 10
DXD	Direct Extension Dialing
DND	Do Not Disturb
Exc Hold	Exclusive Hold
LND	Last Number Dial
ROVRD	Ring Override
SND	Saved Number Dial

(See Note)				

**NOTE:** if there are fewer than eight outside lines on a voice terminal, then those buttons will be blank on the template and on the target voice terminal. For example, if your system has four outside lines (lines A through D), then the template will have four blank buttons in the second column above the dial pad (lines E through H).
