Quick Start

Congratulations on purchasing your iPod photo. Read this section to get started using iPod photo quickly.

iPod photo works with your computer. Import and organize songs and photos on your computer, then transfer them to iPod photo for listening and viewing on the go.

Learning to Use iPod photo

Read this chapter to set up iPod photo and get started playing music quickly. To learn more about playing music on iPod photo and using some of its other features, see "Using iPod photo" on page 13.

iPod photo Features

iPod photo is a music player and much more. With iPod photo, you can:

- Store thousands of songs from your CD or digital music collection, for listening on the go
- Store thousands of digital photos, for backing up or viewing on the go
- Connect iPod photo to a television to view photos in a slideshow with music
- Listen to audiobooks purchased from the iTunes Music Store or audible.com
- · Arrange your music in On-The-Go playlists
- Store or back up files and other data, using iPod photo as an external hard disk
- · Change equalizer settings to make music sound better
- Store and synchronize contact, calendar, and to-do list information from your computer
- · Store text notes
- · Set an alarm
- Record voice memos, using an optional microphone
- Store digital photos, using an optional photo card reader
- · Play games, and more

To purchase a microphone, photo card reader, and other iPod photo accessories, go to www.apple.com/store.

What You Need to Get Started

To use iPod photo with a Macintosh, you must have:

• A Macintosh with built-in FireWire or built-in high-power USB 2.0

6-pin FireWire 400 port

High-power USB 2.0 port (with Mac OS X v10.3.4 or later)

Mac OS X v10.2.8 or later

Mac OS X v10.3.4 or later is recommended (and required to use iPod photo with USB 2.0).

- iTunes 4.7 or later (iTunes is included on the iPod CD)
 To be sure you have the latest version of iTunes, go to www.apple.com/itunes.
- iPod software (included on the iPod CD)
- iPhoto 4.0.3 or later (recommended for transferring photos and albums to iPod photo)

Note: iPhoto may already be installed on your Mac. Check the Applications folder. iPhoto is also part of a suite of applications called iLife, available for purchase at www.apple.com/ilife. If you have iPhoto 4 you can update it to the latest version by choosing Apple menu (**(**) > Software Update. This software is optional. iPod photo can also import digital photos from folders on your computer's hard disk.

Quick Start 5

To use iPod photo with a Windows PC, you must have:

- A Windows PC with 500 MHz or higher processor speed
- Windows 2000 with Service Pack 4 or later, or Windows XP Home or Professional with Service Pack 2 or later
- Built-in FireWire or a FireWire card installed, or built-in high-power USB 2.0 or a high-power USB 2.0 card installed

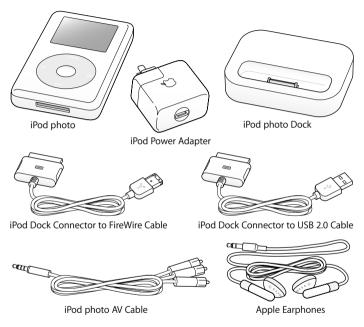

• iTunes 4.7 or later (iTunes is included on the iPod CD)

To be sure you have the latest version of iTunes, go to www.apple.com/itunes.

Note: iPod photo can import photo collections automatically from Adobe Photoshop Album 1.0 or later, and Adobe Photoshop Elements 3.0 or later, available at www.adobe.com. This software is optional. iPod photo can also import digital photos from folders on your computer's hard disk.

Your iPod photo includes the following components:

Note: An iPod Carrying Case (not pictured) is also included.

Quick Start 7

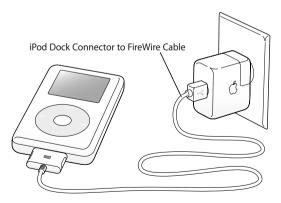

Setting Up iPod photo to Play Music

To set up iPod photo, you charge the battery, install software from the iPod CD, and import songs from your music CD collection or from the iTunes Music Store (available in some countries only). Then you transfer the songs to iPod photo for listening on the go.

To import and view photos on iPod photo, follow the instructions in this chapter to set up iPod photo, then see "Transferring and Viewing Digital Photos" on page 33.

Step 1: Charge the Battery

Connect iPod photo to the iPod Power Adapter using the iPod Dock Connector to FireWire Cable. The built-in battery is 80-percent charged in about three hours, and fully charged in about five hours.

Step 2: Install the Software

Insert the iPod CD into your computer and install iTunes and the iPod software.

Step 3: Import Music to Your Computer

Complete this step if you haven't already transferred music to your computer. You can import music from your audio CDs, or if you have an Internet connection, you can buy music online and download it to your computer using the iTunes Music Store. You can browse hundreds of thousands of songs and listen to a 30-second preview of any song.

To import music to your computer from an audio CD:

- 1 Insert a CD into your computer. iTunes opens automatically and the CD is selected in the iTunes Source list.
- 2 Uncheck songs you don't want to transfer, then click Import.
- 3 Repeat for any other CDs with songs you'd like to import.

To buy music online:

- 1 Open iTunes and click Music Store in the Source list.
- 2 Click the Account button and follow the onscreen instructions to set up an account or enter your existing Apple Account or America Online (AOL) account information.

Quick Start 9

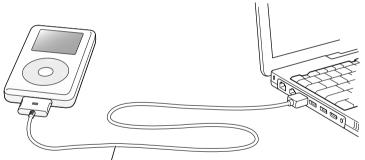

Step 4: Connect iPod photo and Transfer Music

Connect iPod photo to your computer using one of the two included cables. Be sure the connectors on both ends of the cable are oriented correctly. They can only be inserted one way.

If you have a Mac, or if you have a Windows PC with a 6-pin FireWire 400 port, you can use the iPod Dock Connector to FireWire Cable.

If your computer has a high-power USB 2.0 port, you can also use the iPod Dock Connector to USB 2.0 Cable.

You can also use the optional iPod photo Dock (see page 23).

If you are connecting to a FireWire 400 port, use the iPod Dock Connector to FireWire Cable. If you are connecting to a high-power USB 2.0 port, use the iPod Dock Connector to USB 2.0 Cable.

To transfer songs to iPod photo:

When you connect iPod photo to your computer, iTunes opens automatically and transfers the songs and playlists in your music library to iPod photo.

Note: Be sure you have charged the battery using the iPod Power Adapter before you transfer songs to iPod photo. See "Charging the iPod photo Battery" on page 53 for more information.

If your Windows PC doesn't have a 6-pin FireWire 400 (IEEE 1394) port or a high-power USB 2.0 port, here are other ways you can connect iPod photo:

- Purchase a FireWire card or USB 2.0 card, and install it.
- Or, if your computer has a 4-pin FireWire port, you can use an optional 6-pin-to-4-pin FireWire adapter.

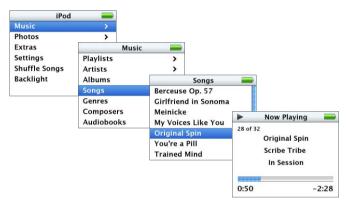

Note: You can't charge iPod photo through your computer using a 4-pin FireWire port.

Quick Start 11

Step 5: Play Music

When the song transfer is complete, a message on the iPod photo screen says "OK to disconnect." Squeeze both sides of the Dock connector to disconnect the cable from iPod photo.

Then use the Click Wheel and Select button to browse for a song. Press the Play or Select button and enjoy!

To learn how to import photos to your computer, transfer them to iPod photo, and view them on iPod photo or on a television, see "Transferring and Viewing Digital Photos" on page 33.

Using iPod photo

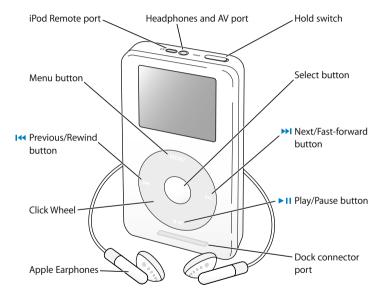

Read this section to learn about using iPod photo controls, transferring music, transferring and viewing photos, charging the battery, and using the extra features of your iPod photo.

Using iPod photo Controls

Press any button to turn on iPod photo. The main menu appears.

Use the Click Wheel and Select button to navigate through onscreen menus, play songs, change settings, and view information. Move your thumb lightly around the Click Wheel to highlight a menu item. Press the Select button to select the item. Press Menu on the Click Wheel to go back to the previous menu.

iPod photo Controls	
Reset iPod photo (For use during troubleshooting)	Toggle the Hold switch (set it to Hold, then turn it off again). Then press the Menu and Select buttons simultaneously for about 6 seconds, until the Apple logo appears.
Turn on iPod photo	Press any button.
Turn off iPod photo	Press and hold Play/Pause.
Turn the backlight on or off	Press and hold Menu or select Backlight from the main menu.
Select a menu item	Scroll to the item by moving your thumb lightly around the Click Wheel, then press the Select button.
Go back to the previous menu	Press Menu.
Browse for a song	Select Music from the main menu.
Play a song	Highlight the song and press the Select or Play/Pause button. iPod photo must be ejected from your computer to play songs.
Play all the songs in a list	Highlight the list title (an album title, or the title of a playlist, for example) and press Play/Pause.
Change the volume	From the Now Playing screen, use the Click Wheel. You can also use the optional iPod Remote (available at www.apple.com/store) from any screen.
Pause a song	Press Play/Pause when no song or list is highlighted.

iPod photo Controls	
Disable the iPod photo buttons (So you don't press them accidentally)	Set the Hold switch to Hold (an orange bar appears).
Skip to any point in a song	From the Now Playing screen, press the Select button to show the scrubber bar (if you see album artwork, press it again). Then scroll to any point in the song.
Skip to the next song	Press Next/Fast-forward.
Start a song over	Press Previous/Rewind.
Play the previous song	Press Previous/Rewind twice.
Fast-forward a song	Press and hold Next/Fast-forward.
Rewind a song	Press and hold Previous/Rewind.
Scroll through photos	From any photo-viewing screen, use the Click Wheel to scroll back and forth through photos.
Skip to the next or previous screen of photos	From any photo-viewing screen, press Next/Fast-forward or Previous/Rewind.
Start a photo slideshow	Select any photo or album and press Play. Or select any full-screen photo and press the Select button.
Skip to the next or previous photo in a slideshow	Press Next/Fast-forward or Previous/Rewind.

Disabling iPod photo Buttons Using the Hold Switch

If you're carrying iPod photo in your pocket and you don't want to press the buttons or turn it on accidentally, you can make the buttons inactive.

Set the Hold switch to Hold.

Slide the switch toward the center (so you can see the orange bar) to disable the controls.

Making Playlists on iPod photo

You can set iPod photo to play the songs you want in the order you want. When you create a list of songs on your iPod photo, the songs appear in an On-The-Go playlist.

To create an On-The-Go playlist:

- 1 Highlight a song and press and hold the Select button until the song title flashes.
- 2 Repeat step 1 for other songs you want to add.
- 3 Select Music > Playlists > On-The-Go to view your list of songs.

You can also queue entire lists of songs at once. For example, to queue an album, highlight the album title and press and hold the Select button until the album title flashes.

To play songs in the On-The-Go playlist:

Select Music > Playlists > On-The-Go and select a song.

To remove a song from the On-The-Go playlist:

 Highlight a song in the playlist, and hold down the Select button until the song title flashes.

To clear the entire On-The-Go playlist:

Select Music > Playlists > On-The-Go > Clear Playlist.

To save On-The-Go playlists on your iPod photo:

Select Music > Playlists > On-The-Go > Save Playlist > Save Playlist.

The first playlist is saved as "New Playlist 1" in the Playlists menu. The On-The-Go playlist is cleared. You can save as many On-The-Go playlists as you like.

To transfer On-The-Go playlists to your computer:

 If iPod photo is set to transfer songs automatically (see page 29), and you create an On-The-Go playlist, the playlist automatically transfers to iTunes when you connect iPod photo. You see the new On-The-Go playlist in the iTunes Source list. You can rename or delete the new playlist, just as you would any other playlist in iTunes.

Rating Songs

You can assign a rating to a song (from 1 to 5 stars) to indicate how much you like it. You can use song ratings to help you create playlists automatically in iTunes (see "About Smart Playlists" on page 28).

To rate a song:

- 1 Start playing the song.
- 2 From the Now Playing screen, press the Select button two or three times, until you see the rating screen (showing either bullet points, stars, or a combination of both).
- 3 Use the Click Wheel to select a rating.

Viewing Album Artwork on iPod photo

You can set iTunes to allow iPod photo to display album art, then view the album artwork on iPod photo.

To set iTunes to allow iPod photo to display album artwork:

1 Select iPod photo in the iTunes Source list and click the Options button.

2 Choose "Display album artwork on your iPod."

To see album artwork on your iPod photo:

- 1 Play a song that has album artwork.
- 2 From the Now Playing screen, press the Select button. If you don't see artwork, either that song doesn't have album artwork, or you need to set iTunes to allow iPod photo to display album artwork (see above).

For more information about album artwork, open iTunes and choose Help > iTunes Help.

Connecting and Disconnecting iPod photo

You connect iPod photo to your computer to transfer music and photos, and, in most cases, to charge the battery.

- If you have a Mac or if you have a Windows PC with a 6-pin FireWire port, you can connect iPod photo using the included iPod Dock Connector to FireWire Cable.
- If your computer has a high-power USB 2.0 port, you can also connect using the included iPod Dock Connector to USB 2.0 Cable (see page 10 for illustrations and more information).

To connect iPod photo to your computer:

 Plug the appropriate cable in to a FireWire or high-power USB 2.0 port on your computer, then connect the other end to iPod photo. Be sure to orient the connectors on the cable correctly. Each connector can only be inserted one way. Or, if you have an iPod photo Dock (see page 23), connect the appropriate cable to a
FireWire or high-power USB 2.0 port on your computer and connect the other end to
the Dock. Then put iPod photo in the Dock.

By default, iPod photo imports songs automatically when you connect it to your computer. When this automatic transfer is done, you can disconnect iPod photo.

Disconnecting iPod photo

You shouldn't disconnect iPod photo while music is being transferred. You can easily see if it's OK to disconnect iPod photo by looking at the screen.

If you see the main menu or a large battery icon, you can disconnect iPod photo from your computer. If you see this message, you must eject iPod photo before disconnecting it from your computer.

If you set iPod photo to transfer songs manually (see page 30) or enable iPod photo for disk use (see page 48), you must eject iPod photo before disconnecting it.

To eject iPod photo:

Click the Eject button (♠) next to iPod photo in the iTunes Source list.

If you're using a Mac, you can also eject iPod photo by dragging the iPod photo icon on the desktop to the Trash.

If you're using a Windows PC, you can eject iPod photo by clicking the Safely Remove Hardware icon in the Windows system tray and selecting your iPod photo.

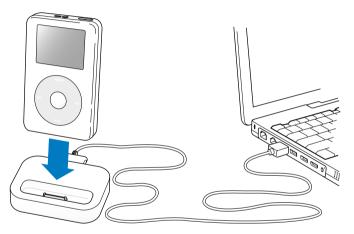

To disconnect iPod photo:

- If iPod photo is connected to an iPod photo cable, squeeze both sides of the Dock connector to disconnect the cable from iPod photo.
- If iPod photo is in the Dock, simply remove it.

Important: Don't disconnect iPod photo if you see the "Do not disconnect" message. You could damage files on iPod photo. If you see this message, you must eject iPod photo before disconnecting it.

Connecting iPod photo Using the iPod photo Dock

The iPod photo Dock holds iPod photo upright as it charges or transfers music. Connect the Dock to your computer using the same cable you use with iPod photo, or connect it to a power outlet using the FireWire cable and power adapter. Then put iPod photo in the Dock.

Note: Be sure the connectors on the cable are oriented correctly. Each connector can only be inserted one way.

Dock At a Glance	
Dock connector port	Connect the Dock to your computer using the included USB 2.0 or FireWire cable, or connect it to the power adapter using the FireWire cable.
iPod connector	Place iPod photo into the Dock to charge iPod photo, transfer songs, view photos, and listen to music.
Line Out port	Connect speakers using an audio cable with a standard 3.5 millimeter stereo miniplug (see page 25). Or connect the iPod photo AV Cable to view photos on television (see page 33).
S-video Out port	Connect an S-video cable to view photos with enhanced clarity on an S-video-equipped television or video device (see page 33). You must use an audio cable to hear sound with a slideshow.

Using the iPod photo Dock, you can play music from iPod photo over external powered speakers or a home stereo. You need an audio cable with a standard 3.5 millimeter stereo miniplug (many external speakers have this type of cable attached).

To play music from iPod photo using the Dock:

- 1 Place iPod photo in the Dock.
- 2 Connect the speakers or stereo to the Dock Line Out port using an audio cable with a 3.5 millimeter stereo miniplug.
- 3 Use the iPod photo controls to play a song.

When the Dock is connected to an external audio source, use the volume controls on the external source to change the volume.

Organizing and Transferring Your Music

For instructions for getting started playing music on iPod photo, see "Setting Up iPod photo to Play Music" on page 8. Read on for more information about organizing and transferring your music.

About iTunes

iTunes is the software application you use to manage the music on your computer and transfer music to iPod photo. When you connect iPod photo to your computer, iTunes opens automatically.

Here are some of the things you can do with iTunes:

- Purchase and download songs and audiobooks from the iTunes Music Store
- Listen to CDs and digital music
- Add music from CDs to your music library, so you don't need to have the CD in the drive to play music
- Make your own CDs (if your computer has a CD burner)
- Publish your playlists, called "iMixes," to the iTunes Music Store
- Create dynamic "Party Shuffle" playlists
- · Listen to Internet radio stations

This guide explains how to transfer songs to iPod photo using iTunes and manage songs on iPod photo. For information about using the other features of iTunes, open iTunes and choose Help > iTunes and Music Store Help.

About the iTunes Music Store

Using iTunes, you can preview, purchase, and download your favorite songs from the iTunes Music Store (available in some countries only). There are hundreds of thousands of songs available for purchase. You can use an Apple Account to purchase songs from the music store, or if you have an America Online (AOL) account, you can use that.

To browse for and purchase music:

- 1 Open iTunes and click Music Store in the Source list.
- 2 Click the Account button and follow the onscreen instructions to set up an account or enter your existing Apple Account or AOL account information.

You can only have music from five different Music Store accounts on one iPod photo.

For more information about the iTunes Music Store, open iTunes and choose Help > iTunes and Music Store Help.

Audio File Formats Supported by iPod photo

- AAC (M4A, M4B, M4P) (up to 320 Kbps)
- Apple Lossless (a high-quality compressed format)
- MP3 (up to 320 Kbps)
- MP3 Variable Bit Rate (VBR)
- WAV
- AA (audible.com spoken word, formats 2, 3, and 4)
- AIFF

A song encoded using Apple Lossless format has full CD-quality sound, but takes up only about half the amount of space as a song encoded using AIFF or WAV format. The same song encoded in AAC or MP3 format takes up even less space. When you import music from a CD using iTunes, it is converted to AAC format by default.

Using iTunes for Windows, you can convert nonprotected WMA files to AAC or MP3 format. This can be useful if you have a library of music encoded in WMA format. For more information, open iTunes and choose Help > iTunes and Music Store Help.

iPod photo does not support WMA, MPEG Layer 1, MPEG Layer 2 audio files, or audible.com format 1.

About Playlists

Using iTunes, you can organize songs into playlists. For example, you can create a playlist with songs to listen to while exercising or with songs for a particular mood.

You can create as many playlists as you like using any of the songs in your computer's music library. Putting a song in a playlist doesn't remove it from the library.

When you connect and update iPod photo, the playlists are transferred to iPod photo. To browse through playlists, select Music > Playlists on iPod photo.

About Smart Playlists

Using iTunes, you can automatically create customized Smart Playlists from the songs in your library. You can create a Smart Playlist that includes only certain genres of music, songs by certain artists, or songs that match particular criteria. For example, you could create a playlist that's no more than 3 gigabytes (GB) in size and includes only songs you have rated 3 stars or higher (see "Rating Songs" on page 19).

After you create a Smart Playlist, any songs on iPod photo that meet the Smart Playlist's criteria are automatically added to the Smart Playlist.

Creating Playlists on Your Computer

To create a playlist:

• In iTunes, click the Add (+) button and type a name for the playlist, then drag songs from the library or another playlist to the new playlist.

To create a Smart Playlist:

 In iTunes, choose File > New Smart Playlist and choose the criteria for your playlist. Any songs from your library that match the criteria you choose are automatically added to the playlist.

Transferring Songs and Playlists to iPod photo Automatically

By default, iPod photo updates automatically when you connect it to your computer.

To transfer music to iPod photo automatically:

Simply connect iPod photo to your computer using the included FireWire or USB 2.0 cable.

iPod photo must be set to transfer music automatically.

To set iPod photo to transfer music automatically:

1 Select iPod photo in the iTunes Source list and click the Options button.

2 Select "Automatically update all songs and playlists."

iTunes updates the iPod photo music library to match the songs and playlists in your computer's music library, transferring new songs to iPod photo and deleting songs from iPod photo that aren't in your music library.

You can set iPod photo to transfer only certain songs in your iTunes music library. This is useful if you have more music on your computer than will fit on your iPod photo.

To update iPod photo with only certain songs:

- 1 In iTunes, check the boxes next to songs you want to transfer (by default, all songs are checked).
- 2 Select iPod photo in the iTunes Source list and click the Options button.

3 Select "Only update checked songs."

To set iPod photo to update only selected playlists:

- 1 In iTunes, select iPod photo in the Source list and click the Options button.
- 2 Select "Automatically update selected playlists only."

Transferring Songs and Playlists to iPod photo Manually

You can set iPod photo to transfer songs manually, so you can transfer individual songs and playlists. This is especially useful if you want to use iPod photo with more than one computer.

When iPod photo is set to transfer songs manually, iTunes won't update it automatically when you connect it to your computer.

To set iPod photo to transfer songs manually:

1 In iTunes, select iPod photo in the Source list and click the Options button.

2 Select "Manually manage songs and playlists."

To transfer a song or playlist to iPod photo manually:

• In iTunes, drag a song or playlist to iPod photo in the Source list.

Deleting Songs and Playlists From iPod photo Manually

If you have set iPod photo to transfer songs manually (see above), you can delete songs and playlists from iPod photo individually. Songs deleted from iPod photo manually are not deleted from the iTunes library.

To delete a song or playlist from iPod photo:

- 1 Select iPod photo in the iTunes Source list.
- 2 Select a song or playlist and press the Delete key on the keyboard.
 If you delete a playlist, the songs in the playlist remain on iPod photo.

Modifying Playlists on iPod photo Manually

If you have set iPod photo to transfer songs manually (see above), you can create new playlists on iPod photo, and add songs to or delete songs from playlists already on iPod photo.

To create a new playlist on iPod photo:

- 1 Select iPod photo in the iTunes Source list and click the Add (+) button.
- 2 Drag songs to the new playlist.

To modify a playlist on iPod photo:

 Drag a song to a playlist on iPod photo to add the song. Select a song in a playlist and press the Delete key on your keyboard to delete the song.

Listening to Spoken Word Audio

You can purchase and download spoken word audiobooks from the iTunes Music Store (available in some countries only) or from audible.com and listen to them on your iPod photo.

You can use iTunes to transfer audiobooks to your iPod photo the same way you transfer songs.

If you stop listening to an audiobook on iPod photo and go back to it later, the audiobook begins playing from where you left off.

Unless you're playing songs from within playlists, iPod photo skips audiobooks when set to shuffle

Setting the Reading Speed

You can play audiobooks at speeds faster or slower than normal.

To set the playing speed of an audiobook:

Select Settings > Audiobooks.

Setting the reading speed only affects audiobooks purchased from the iTunes Music Store or audible.com.

Seeing How Many Songs and Photos Are on iPod photo

To see how many songs and photos are stored on iPod photo, how much disk space is left, and other information, select Settings > About in the iPod photo main menu.

Transferring and Viewing Digital Photos

You can import digital photos from a digital camera to your computer, then transfer them and view them on iPod photo. You can connect iPod photo to a television and view photos in a slideshow with music.

Importing Photos to Your Computer

You can import photos from a digital camera or a photo card reader.

To import photos to a Mac using iPhoto:

- 1 Connect the camera or photo card reader to your computer. Open iPhoto if it doesn't open automatically.
- 2 Click Import. Images from the camera are imported into iPhoto.

You can import other digital images into iPhoto, such as images you download from the web. For more information about importing and working with photos and other images, open iPhoto and choose Help > iPhoto Help.

iPhoto is available for purchase as part of the iLife suite of applications at www.apple.com/ilife. iPhoto may already be installed on your Mac, in the Applications folder

To import photos to a Mac using Image Capture:

If you don't have iPhoto, you can import photos using Image Capture.

- 1 Connect the camera or photo card reader to your computer.
- 2 Open Image Capture (inside the Applications folder) if it doesn't open automatically.
- 3 Click Download Some to choose specific items to transfer, or click Download All to transfer all items

To import photos to a Windows PC:

• Follow the instructions that came with your digital camera or photo application.

Transferring Photos From Your Computer to iPod photo

You can transfer photos from a folder on your hard disk. If you have a Mac and iPhoto 4.0.3 or later, you can transfer iPhoto albums automatically. If you have a Windows PC and Adobe Photoshop Album 1.0 or later, or Adobe Photoshop Elements 3.0 or later, you can transfer photo collections automatically.

The first time you transfer photos to iPod photo may take some time (possibly over an hour) depending upon how many photos are in your photo library.

To transfer photos from a Mac to iPod photo using iPhoto:

1 Open iTunes and select iPod photo in the iTunes Source list. Then click the Options button.

- 2 Click Photos and select "Synchronize photos from." Then choose iPhoto from the pop-up menu.
- 3 If you want to import all of your photos, select "Copy all photos." If you only want to import photos from certain iPhoto albums, select "Copy selected albums only" and select the albums or collections you want.

Each time you connect iPod photo to your computer, photos are transferred automatically.

To transfer photos from a Windows PC to iPod photo using Photoshop Album or Photoshop Elements:

1 Open iTunes and select iPod photo in the iTunes Source list. Then click the Options button.

- 2 Click Photos and select "Synchronize photos from." Then choose Photoshop Album or Photoshop Elements from the pop-up menu.
- 3 If you want to import all of your photos, select "Copy all photos." If you only want to import photos from certain Photoshop Album or Photoshop Elements collections, select "Copy selected albums only" and select the albums or collections you want.

Note: Some versions of Photoshop Album and Photoshop Elements don't support collections. You can still use them to transfer all your photos.

Each time you connect iPod photo to your computer, photos are transferred automatically.

To transfer photos from a folder on your hard disk to iPod photo:

- 1 Drag the images you want into a folder on your computer.
 If you want images to appear in separate photo albums on iPod photo, create folders inside the main image folder, and drag images into the new folders.
- 2 Open iTunes and select iPod photo in the iTunes Source list. Then click the Options button.

- 3 Click Photos and select "Synchronize photos from."
- 4 Choose "Choose Folder" from the pop-up menu and select your image folder.

To transfer full-resolution image files:

When you transfer photos to iPod photo, iTunes optimizes the photos for viewing. Full-resolution image files aren't transferred by default. Transferring full-resolution image files is useful if you want to store your images or move them from one computer to another, but is not necessary to view the images at full quality on iPod photo.

1 Open iTunes and select iPod photo in the iTunes Source list. Then click the Options button.

2 Click Photos and select "Include full-resolution photos."

iTunes copies the full-resolution versions of the photos to the Photos folder on your iPod photo. To open the Photos folder, you must enable iPod photo for disk use (see page 48).

Viewing Photos

You can view photos on iPod photo manually or in a slideshow. You can connect iPod photo to a television and view photos in a slideshow with music.

To view photos on iPod photo:

- 1 On iPod photo, select Photos > Photo Library. Or select Photos and choose a photo album to see only the photos in the album.
- 2 Highlight the photo you want and press the Select button to view a full-screen version. From any photo-viewing screen, use the Click Wheel to scroll through photos. Use the Next/Fast-forward and Previous/Rewind buttons to skip to the next or previous screen of photos.

Viewing Slideshows

You can view a slideshow, with music and transitions if you choose, on iPod photo or on a television.

To set slideshow settings:

- Select Photos > Slideshow Settings, then follow the instructions below:
 - To set slideshows to display on iPod photo, set TV Out to Ask or Off.
 - To set slideshows to display on television, set TV Out to Ask or On.
 If you set TV Out to Ask, iPod photo will give you a choice to show slideshows on television or on iPod photo every time you start a slideshow.
 - To set the length of time each slide is displayed before advancing, select Time Per Slide and choose a time.
 - To set the music that plays during slideshows, select Music and choose a playlist. If you're using iPhoto, you can choose From iPhoto to copy the iPhoto music setting.
 Only the songs that you have transferred to iPod photo play.
 - To set slides to repeat, set Repeat to On.
 - To set slides to display in random order, set Shuffle Photos to On.
 - To set slides to display with wipe transitions, set Transitions to On.
 - To set slides to show on PAL or NTSC televisions, set TV Signal to PAL or NTSC.

Note: PAL and NTSC refer to television broadcast standards. Your television may use either of these, depending on the region where it was purchased. If you aren't sure which your television uses, check the documentation that came with your television.

To view a slideshow on iPod photo:

 Select any photo or album and press Play. Or select any full-screen photo and press the Select button. To pause the music and the slideshow, press the Play/Pause button.

If you selected a playlist in Photos > Slideshow Settings > Music, the playlist plays automatically when you start the slideshow. The photos advance automatically according to settings in the Slideshow Settings menu. To skip to the next or previous photo manually, press the Next/Fast-forward or Previous/Rewind button.

To connect iPod photo to a television:

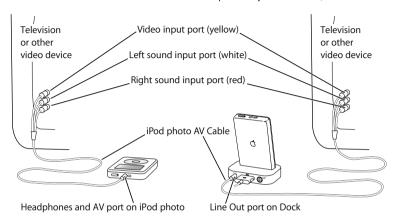

Your television must have RCA video and audio ports, or an S-video port.

1 Connect the included iPod photo AV Cable to the Headphones port on iPod photo.

You can also connect the iPod photo AV Cable to the Line Out port on the iPod photo Dock and put iPod photo in the Dock. You must use an iPod photo Dock. Other iPod Docks won't work

Important: Use RCA cables made specifically for iPod photo. Other similar cables won't work.

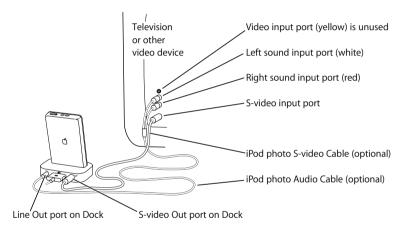

2 Connect the video and audio connectors to the ports on your television, as shown.

Connecting iPod photo using S-video:

For increased visual clarity, you can also connect iPod photo to a television, video receiver, or other device that has an S-video port using an S-video cable and the iPod photo Dock. You can purchase audio and S-video cables at www.apple.com/store.

To hear music with the slideshow, you must connect an audio cable to the Line Out port on the iPod photo Dock and to an audio input port on the television or receiver.

To view a slideshow on a television:

- 1 Connect iPod photo to a television as shown above.
- 2 Turn on your television and set it to display from the input ports to which your iPod photo is connected. See the documentation that came with your television for more information.
- 3 On iPod photo, select any photo or album and press Play. Or select any full-screen photo and press the Select button. To pause the music and the slideshow, press the Play/Pause button.

If you selected a playlist in Photos > Slideshow Settings > Music, the playlist plays automatically when you start the slideshow. The photos display on your television and advance automatically according to settings in the Slideshow Settings menu. To skip to the next or previous photo manually, press the Next/Fast-forward or Previous/Rewind button.

Storing Digital Photos From a Photo Card Reader

Note: Using an optional iPod photo-compatible photo card reader (available for purchase at www.apple.com/store) and a standard digital camera and photo card, you can store photos on iPod photo, then delete them from the photo card and take more pictures. Then later you can transfer the photos from iPod photo to your computer using a standard digital photo application (such as iPhoto, on a Macintosh). You can't view photos transferred from a photo card reader directly to iPod photo. To view the photos on iPod photo, you must transfer them to your computer, then import them to iPod photo using iTunes.

To store photos from an optional photo card reader on iPod photo:

- 1 Insert a photo card into the photo card reader and connect the photo card reader to the Dock connector port on iPod photo.
- 2 Select Import.

Photos are listed on iPod photo by roll number.

Note: Some digital photo storage devices may work differently. Consult the instructions that came with the device.

To view information about photos stored on iPod photo:

Select Photos > Photo Import and select the roll number.

The type of media, number of photos, and size of the roll are displayed. You can't view the photos on iPod photo.

Note: The Photo Import menu item doesn't appear unless you connect a photo card reader.

To erase photos from a photo card:

- 1 Import photos from the card (see above).
- 2 Select Erase Card. All photos are deleted from the photo card.

To transfer photos to your computer:

 Connect iPod photo to your computer and open the application you use to transfer photos from your digital camera. See the documentation that came with the application for more information.

If you are using a Macintosh, you can use iPhoto or Image Capture to transfer photos.

Note: Photos are stored in a DCIM (digital camera images) folder on iPod photo. You can also transfer images to your computer by opening this folder and dragging the image files to the desktop. iPod photo must be enabled for use as a hard disk.

For more information about using an iPod photo-compatible photo card reader, see the instructions that came with the reader.

Adjusting iPod photo Settings

You can change settings directly on iPod photo in the Settings menu.

Setting iPod photo to Shuffle Songs

You can set iPod photo to play songs or albums in random order.

To shuffle and begin playing all your songs:

 Select Shuffle Songs from the iPod photo main menu.
 iPod photo begins playing songs from your entire music library in random order, skipping audiobooks.

To set iPod photo to shuffle songs or albums every time you play a song:

- 1 Select Settings from the iPod photo main menu.
- 2 Set Shuffle to Songs or to Albums.

When you set iPod photo to shuffle songs by selecting Settings > Shuffle, iPod photo shuffles songs within the list (album or playlist, for example) from which the songs are playing.

When you set iPod photo to shuffle albums, it plays all the songs on an album in order, then randomly selects another album in the list and plays through it in order.

Setting iPod photo to Repeat Songs

You can set iPod photo to repeat a song over and over, or to repeat a sequence of songs. iPod photo repeats songs within the list from which the songs are playing.

To set iPod photo to repeat songs:

- Select Settings from the iPod photo main menu.
 - To repeat all songs in the list, set Repeat to All.
 - To repeat one song over and over, set Repeat to One.

Setting the Click Wheel Sound

When you scroll through menu items, you can hear a clicking sound through the iPod photo internal speaker to let you know the Click Wheel is working. You can set the Click Wheel sound to play through the headphones instead, or you can turn it off.

To set how iPod photo plays the Click Wheel sound:

- Select Settings from the iPod photo main menu.
 - To set the Click Wheel sound to play through the headphones, set Clicker to Headphones.
 - To turn off the Click Wheel sound, set Clicker to Off.
 - To set the Click Wheel sound to play through the iPod photo internal speaker, set Clicker to Speaker.
 - To set the Click Wheel sound to play through both the iPod photo internal speaker and the headphones, set Clicker to Both.

Setting Songs to Play at the Same Relative Volume Level

iTunes can automatically adjust the volume of songs, so they play at the same relative volume level. You can set iPod photo to use the iTunes volume settings.

To set iTunes to adjust all songs to play at the same relative sound level:

- 1 In iTunes, choose iTunes > Preferences if you are using a Mac, or choose Edit > Preferences if you are using a Windows PC.
- 2 Click Effects and select Sound Check.

To set iPod photo to use the iTunes volume settings:

Select Settings > Sound Check.

If you have not activated Sound Check in iTunes, setting it on iPod photo has no effect.

Using the Equalizer

You can use equalizer presets to change iPod photo sound to suit a particular music genre or style. For example, to make rock music sound better, set the equalizer to Rock.

Select Settings > EQ and select an equalizer preset.
 If you have assigned an equalizer preset to a song in iTunes and the iPod photo equalizer is set to Off, then the song plays using the iTunes setting. See iTunes and Music Store Help for more information.

Setting the Backlight Timer

You can set the backlight to turn on for a certain amount of time when you press a button or use the Click Wheel.

• Select Settings > Backlight Timer and select the time you want.

Even if you don't set the backlight timer, you can turn on the backlight at any time by pressing and holding the Menu button on iPod photo or selecting Backlight from the main menu. After a few seconds, the backlight turns off.

Adding or Removing Items From the Main Menu

You can add often-used items to the iPod photo main menu. For example, you can add a "Songs" item to the main menu, so you don't have to select Music before you select Songs.

To add or remove items from the main menu:

Select Settings > Main Menu.

Setting and Viewing the Date and Time

To set the date and time:

Select Settings > Date & Time.

To view the date and time:

Select Extras > Clock.

To set iPod photo to display the time in the title bar:

Select Settings > Date & Time.

If you set iPod photo to display the time in the title bar, you can see the time from any iPod photo menu screen.

Setting the Language

iPod photo can be set to use different languages.

Select Settings > Language and select a language.

Using the Extra Features of Your iPod photo

Using iPod photo as an External Hard Disk

You can use iPod photo as a hard disk, to store and transfer data files.

To enable iPod photo as a hard disk:

1 In iTunes, select iPod photo in the Source list and click the Options button.

2 Click General and select "Enable disk use."

When you use iPod photo as a hard disk, the iPod photo disk icon appears on the desktop on the Mac, or as the next available drive letter in Windows Explorer on a Windows PC

Note: Clicking Music and selecting "Manually manage songs and playlists" in the Options window also enables iPod photo to be used as a hard disk.

Note: To transfer music files to iPod photo, you must use iTunes. Songs transferred via iTunes do not appear on iPod photo in the Macintosh Finder or Windows Explorer. Likewise, if you copy music files to iPod photo in the Macintosh Finder or Windows Explorer, you won't be able to play them on iPod photo.

Preventing iTunes From Opening Automatically

If you use iPod photo primarily as a hard disk, you may want to keep iTunes from opening automatically when you connect iPod photo to your computer.

To prevent iTunes from opening automatically when you connect iPod photo to your computer:

- 1 In iTunes, select iPod photo in the Source list and click the Options button.
- 2 Click General and deselect "Open iTunes when attached."

Setting the Sleep Timer

You can set iPod photo to turn off automatically after playing music or a slideshow for a specific period of time.

• Select Extras > Clock > Sleep Timer and select the time you want.

When you set the sleep timer, a clock icon and the number of minutes left until iPod photo turns off appear in the Now Playing screen on iPod photo.

Setting the Alarm

You can use iPod photo as an alarm clock.

To set an alarm:

- 1 Select Extras > Clock > Alarm Clock.
- 2 Set Alarm to On.
- 3 Select a sound.

If you select Beep, the alarm will be audible through the internal speaker. If you select a playlist, you'll need to connect iPod photo to speakers or headphones to hear the alarm.

Importing Addresses, Phone Numbers, Calendar Events, and To-Do Lists

Your iPod photo can store contacts, calendar events, and to-do lists, for viewing on the go.

If you are using a Mac and iSync, it's as easy as clicking a button.

Synchronizing information using iSync requires Mac OS X v10.2.8 or later, iSync 1.1 or later, and iCal 1.0.1 or later.

To import all information using a Mac and iSync:

- 1 Connect iPod photo to your computer.
- 2 Open iSync and choose Devices > Add Device. You only need to do this step the first time you use iSync with your iPod photo.
- 3 Select iPod photo and click Sync Now.
 iSync transfers information from iCal and Mac OS X Address Book to your iPod photo.

The next time you want to sync iPod photo, you can simply open iSync and click Sync Now. You can also choose to have iPod photo sync automatically when you connect it.

Note: iSync transfers information from your computer to iPod photo. You can't use iSync to transfer information from your iPod photo to your computer.

If you are using Windows, or you don't want to import using iSync, you can transfer information to iPod photo manually. iPod photo must be enabled as a hard disk (see "Using iPod photo as an External Hard Disk" on page 48).

To import contact information manually:

- 1 Connect iPod photo and open your favorite email or contacts application. Importing contacts works with Palm Desktop, Microsoft Outlook, Microsoft Entourage, and Eudora, among others.
- 2 Drag contacts from the application's address book to the iPod photo Contacts folder.

To import appointments and other calendar events manually:

- 1 Export calendar events from any calendar application that uses the standard iCalendar format (filenames end in .ics) or vCal format (filenames end in .vcs).
- 2 Drag the files to the Calendars folder on iPod photo.

Note: You can only transfer to-do lists to iPod photo using iSync and iCal.

To view contacts on iPod photo:

Select Extras > Contacts.

To view calendar events:

Select Extras > Calendar.

To view to-do lists:

Select Extras > Calendar > To Do.

Storing and Reading Notes and Other Information

You can store and read text notes on iPod photo. iPod photo must be enabled as a hard disk (see page 48).

- 1 Save a document in any word-processing application as a text (.txt) file.
- 2 Place the file in the Notes folder on iPod photo.

To view notes:

Select Extras > Notes.

Recording Voice Memos

You can record voice memos using an optional iPod photo-compatible microphone (available for purchase at www.apple.com/store). You can store voice memos on your iPod photo and transfer them to your computer.

To record a voice memo:

- 1 Connect a microphone to the Headphones port on your iPod photo and select Record to begin recording.
- 2 Hold the microphone a few inches from your mouth and speak. To pause recording, select Pause.
- 3 When you're finished recording, select Stop and Save. Your recording is saved and listed by date and time recorded.

To play a recording:

Select Extras > Voice Memos and select the recording.

Note: The Voice Memos menu item doesn't appear until you connect a microphone.

To transfer voice memos to your computer:

Voice memos are saved in a Recordings folder on iPod photo in the WAV file format. If you enable iPod photo for disk use, you can drag voice memos from the folder to copy them

If iPod photo is set to transfer songs automatically (see page 29) and you record voice memos, the voice memos are automatically transferred to a playlist in iTunes when you connect iPod photo. You see the new Voice Memos playlist in the iTunes Source list.

Playing Games

iPod photo has a number of games.

To play a game:

Select Extras > Games and select a game.

Charging the iPod photo Battery

iPod photo has an internal, non-user-replaceable battery. If iPod photo isn't used for a while, the battery may need to be charged.

The iPod photo battery is 80-percent charged in about three hours, and fully charged in about five hours. If you charge iPod photo while transferring files, playing music or viewing a slideshow, it may take longer.

You can charge the iPod photo battery in two ways:

- If you have a Mac, you can charge iPod photo by connecting it to your computer. If you have a Windows PC, in most cases you can charge iPod photo by connecting it to your computer.
- You can also charge iPod photo by connecting it to the power adapter and a working electrical outlet.

To charge the battery using your computer:

 Connect iPod photo to a 6-pin FireWire port or high-power USB 2.0 port on your computer using the appropriate cable. The computer must be turned on and not in sleep mode (some models of Macintosh can charge iPod photo while in sleep mode).

Note: While songs, photos, or files are transferred using USB 2.0, the iPod photo battery loses charge. Transferring songs or files when iPod photo isn't sufficiently charged can cause incomplete transfer, loss of the information being transferred, and may require a restore (see page 66). It's best to charge iPod photo using the iPod Power Adapter before transferring songs or files.

If the battery icon in the upper-right corner of the iPod photo screen shows a lightning bolt, the battery is charging. If it shows a plug, the battery is fully charged.

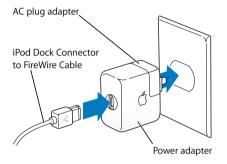

If you don't see the lightning bolt or the plug, you must charge the battery using the iPod Power Adapter.

To charge the battery using the iPod Power Adapter:

- 1 Connect the AC plug adapter to the power adapter (this may already be assembled).
- 2 Connect the iPod Dock Connector to FireWire Cable to the power adapter, and plug the other end of the cable in to iPod photo.
- 3 Plug the power adapter in to a working electrical outlet.

Warning Make sure the power adapter is fully assembled before plugging it in to an electrical outlet.

Battery States

When iPod photo is not connected to a power source, a battery icon in the top-right corner of the iPod photo screen shows about how much charge is left.

Battery less than 20% charged

Battery about halfway charged

If iPod photo is connected to a power source, the battery icon changes to show that the battery is charging or fully charged.

Battery charging

Battery fully charged

You can disconnect and use iPod photo before it is fully charged.

Note: Rechargeable batteries have a limited number of charge cycles and may eventually need to be replaced. Battery life and number of charge cycles vary by use and settings. For more information, go to www.apple.com/batteries.

iPod photo Accessories

iPod photo comes with some accessories, and many other accessories are available at www.apple.com/store.

iPod Remote (Available Separately)

To use the iPod Remote, connect it to the iPod Remote port, then connect the Apple Earphones (or another set of headphones) to the remote. Use the buttons on the remote just as you would use the iPod photo buttons.

Use the remote's Hold switch to disable the remote's buttons. The iPod photo Hold switch and the iPod Remote Hold switch do not affect one another.

Note: During slideshows, you can use the remote to adjust the volume, but you can't use it to skip to the next or previous photo.

Apple Earphones

iPod photo comes with a pair of high-quality earbud headphones.

To use the earbud headphones:

• Plug them in to the Headphones port, then place the earbud in your ear as shown.

Warning Permanent hearing loss may occur if earbuds or headphones are used at high volume. You can adapt over time to a higher volume of sound, which may sound normal but can be damaging to your hearing. Set your iPod photo volume to a safe level before that happens. If you experience ringing in your ears, reduce the volume or discontinue use of your iPod photo.

Available Accessories

To purchase iPod photo accessories, go to www.apple.com/store.

Available accessories include:

- iPod photo Dock
- iPod In-Ear Headphones
- iPod Dock Connector to FireWire Cable
- iPod Audio Cable
- iPod photo AV Cable
- iPod Remote + Earphones
- · iPod Power Adapter
- iPod Carrying Cases
- World Travel Adapter Kit
- Third-party accessories such as speakers, headsets, microphones, photo card readers, backup batteries, car stereo adapters, power adapters, and more

Tips and Troubleshooting

Most problems with iPod photo can be solved quickly by following the advice in this chapter.

Resetting iPod photo

Most problems with iPod photo can be solved by resetting it.

To reset iPod photo:

- 1 Connect iPod photo to a power outlet using the iPod Power Adapter.
- 2 Toggle the Hold switch on and off (set it to Hold, then turn it off again).
- 3 Press and hold the Select and Menu buttons for at least 6 seconds, until the Apple logo appears.

If Your iPod photo Won't Turn On or Respond

- Make sure the Hold switch is off.
- If you're using the iPod Remote, make sure the remote's Hold switch is off.
- If that doesn't work, connect iPod photo to the iPod Power Adapter and connect the adapter to a working electrical outlet. Your iPod photo battery may need to be recharged.
- If that doesn't work, your iPod photo may need to be reset (see above).

 If that doesn't work, you may need to restore iPod photo software. See "iPod photo Software Update and Restore" on page 66.

If You Want to Disconnect iPod photo, but the Screen Says "Do not disconnect"

- If iPod photo is transferring music, wait for the transfer to complete.
- Select iPod photo in the iTunes Source list and click the Eject button.
- If iPod photo disappears from the iTunes Source list, but you still see the "Do not disconnect" message on the iPod photo screen, go ahead and disconnect iPod photo.
- If iPod photo doesn't disappear from the iTunes Source list, drag the iPod photo icon from the desktop to the Trash (if you're using a Mac) or click the Safely Remove Hardware icon in the system tray and select your iPod photo (if you're using a Windows PC). If you still see the "Do not disconnect" message, restart your computer and eject iPod photo again.

If Your iPod photo Isn't Playing Music

- · Make sure the Hold switch is off.
- If you're using the iPod Remote, make sure the remote's Hold switch is off.
- Make sure the headphones connector is pushed in all the way.
- Make sure the volume is adjusted properly.
- If that doesn't work, push the Play/Pause button. Your iPod photo may be paused.
- Make sure you are using iTunes 4.7 (included on the iPod CD) or later. Songs
 purchased from the iTunes Music Store using earlier versions of iTunes won't play on
 iPod photo until you upgrade iTunes and transfer the songs.

- If you're using the iPod photo Dock, be sure the iPod photo is seated firmly in the Dock and make sure all cables are connected properly.
- If you are using the Dock Line Out port, make sure your external speakers or stereo are turned on and working properly.

If You Connect iPod photo to Your Computer and Nothing Happens

- Make sure you have installed the software from the iPod CD.
- Make sure you have the required computer and software. See "What You Need to Get Started" on page 5.
- Your iPod photo may need to be reset (see page 60).
- Check the cable connections. Unplug the cable at both ends and make sure no
 foreign objects are in the FireWire or USB ports. Then plug the cable back in securely.
 Use only Apple iPod photo cables. Be sure the connectors on the cables are oriented
 correctly. They can only be inserted one way.
- If you're connecting iPod photo to a portable or laptop computer using the iPod Dock Connector to USB 2.0 Cable, connect the computer to a power outlet before connecting iPod photo.
- If that doesn't work, restart your computer.
- If that doesn't work, you may need to restore iPod photo software. See "iPod photo Software Update and Restore" on page 66.

If You Can't See Photos on Your Television

- Be sure your television is set to display images from the correct input source (see the documentation that came with your television for more information).
- Be sure all cables are connected correctly (see page 39).

- If you're using the iPod photo AV Cable, be sure the yellow end is connected to the video port on your television.
 - **Note:** Use RCA cables made specifically for iPod photo. Other similar cables won't work
- On iPod photo, go to Photos > Slideshow Settings and set TV Out to On, then try
 again.
- If that doesn't work, on iPod photo, go to Photos > Slideshow Settings and set TV Signal to PAL or NTSC, depending on which type of television you have. Try both settings.

If You See a Folder With an Exclamation Point on the iPod photo Display

- iPod photo may need to be reset (see page 60).
- If that doesn't work, your iPod photo battery may need to be recharged. Connect
 iPod photo to the iPod Power Adapter and connect the adapter to a working
 electrical outlet. If you still see the folder, reset iPod photo again.
- If that doesn't work, you may need to update or restore iPod photo with the latest software. Be sure you have installed the software from the iPod CD, or go to www.apple.com/ipod to get the latest software. Then follow the instructions on page 66 to update or restore the iPod photo software.

If Songs or Data Transfer More Slowly Over USB 2.0

- If you transfer a large amount of songs or data using USB 2.0 and the iPod photo battery is low, iPod photo will go into power-saving mode. Transfer speeds will slow down considerably. This is normal.
- If you want to transfer at higher speeds, you can stop the transfer, eject the iPod photo, and connect it to a power outlet using the iPod Power Adapter. Let iPod photo charge for about an hour, then connect it to your computer again to transfer music.

If You Connect iPod photo to a USB Port and It Doesn't Work Correctly

- You must use a FireWire port or a USB 2.0 port to connect iPod photo. USB 1.1 is not supported and is significantly slower than FireWire and USB 2.0. If your Windows PC doesn't have a FireWire port or USB 2.0 port, you can purchase a Windows-certified FireWire card or USB 2.0 card and install it. For more information, go to www.apple.com/ipod.
- If you're connecting iPod photo to a portable or laptop computer using the iPod Dock Connector to USB 2.0 Cable, connect the computer to a power outlet before connecting iPod photo.
- If you're using a Mac or a Windows PC with a 6-pin FireWire port, connect iPod photo to a FireWire port using the FireWire cable that came with iPod photo.

If You Accidentally Set iPod photo to Use a Language You Don't Understand

You can reset the language.

- 1 Push Menu repeatedly until the main menu appears.
- 2 Select the fourth menu item (Settings).
- 3 Select the last menu item (Reset All Settings).
- 4 Select the second menu item (Reset) and select a language.

Other iPod photo settings, such as song repeat, are also reset.

Note: If you have added or removed items from the iPod photo main menu (see page 47), the Settings menu may be in a different place.

If Your iPod Remote Isn't Working

- Make sure the remote's Hold switch is off.
- Make sure the remote is plugged firmly in to iPod photo, and that the headphones are plugged firmly in to the remote.

The iPod Remote is included with some models of iPod photo, and can be purchased separately at www.apple.com/store.

If You Want to Use Your iPod photo With a Mac and a Windows PC

If you are using your iPod photo with a Mac and you want to use it with a Windows PC (or vice versa), you must restore the iPod photo software for use with the other computer using iPod photo Software Update (see "iPod photo Software Update and Restore" below). Restoring the iPod photo software erases all data from iPod photo, including all songs.

You cannot switch from using iPod photo with a Mac to using it with a Windows PC (or vice versa) without erasing all data on iPod photo.

iPod photo Software Update and Restore

Apple periodically updates iPod photo software to improve performance or add features. It is recommended that you update your iPod photo to use the latest software.

You can choose either to update or to restore the iPod photo software.

- If you choose to update, the software is updated, but your settings and songs are not affected.
- If you choose to restore, all data is erased from your iPod photo, including songs, files, contacts, photos, calendar information, and any other data. All iPod photo settings are restored to their original state.

To update or restore iPod photo with the latest software:

- 1 Go to www.apple.com/support/ipod and download the latest iPod Update. The update has the latest software for all models of iPod.
- 2 Double-click the software install file and follow the onscreen instructions to install the iPod photo Update.
- 3 Connect iPod photo to your computer and open iTunes. The iPod Updater application opens.
 - If you're using a Windows PC and the iPod Updater application doesn't open automatically, you can find the updater by choosing Start > All Programs > iPod.

4 Follow the onscreen instructions to update or restore iPod photo software.

If you use the iPod Updater application and it doesn't see that iPod photo is connected to your computer, reset iPod photo (see page 60).

If you want to restore iPod photo software and you don't have an Internet connection, you can use the iPod Updater application that was installed on your computer when you installed the software from the iPod CD.

To restore iPod photo software using the iPod Updater application that came on your iPod CD:

- If you have a Mac, you can find the iPod Updater application in Applications/Utilities.
- If you have a Windows PC, you can find the iPod Updater application by choosing Start > All Programs > iPod.

Learning More, Service, and Support

There is more information about using iPod photo on the iPod CD, in onscreen help, and on the web.

Onscreen Help

- To learn more about using iTunes, open iTunes and choose Help > iTunes and Music Store Help.
- To learn more about using iPhoto (on Mac OS X) to import, edit, and manage photos and other images, open iPhoto and choose Help > iPhoto Help.
- To learn more about using iSync (on Mac OS X), open iSync and choose Help > iSync Help.
- To learn more about using iCal (on Mac OS X), open iCal and choose Help > iCal Help.

Online Resources

For the latest information on iPod photo, go to www.apple.com/ipod.

For iPod photo service and support information, a variety of forums with product-specific information and feedback, and the latest Apple software downloads, go to www.apple.com/support/ipod.

To register iPod photo (if you didn't do it when you installed software from the iPod CD), go to www.apple.com/register.

For an online iTunes tutorial (available in some areas only), go to www.apple.com/support/itunes.

Obtaining Warranty Service

If the product appears to be damaged or does not function properly, please follow the advice in this booklet, the onscreen help, and the online resources.

If the unit still does not function, go to www.apple.com/support for instructions on how to obtain warranty service.

Finding the Serial Number of Your iPod photo

The serial number is printed on the back of your iPod photo. You can also find it by selecting Settings > About.

Safety and Cleaning

Read on to learn about using iPod photo safely and cleaning iPod photo.

Important Safety Instructions

When setting up and using your iPod photo, remember the following:

- Read all the installation instructions carefully before you plug your iPod Power Adapter in to a power outlet.
- Keep these instructions handy for reference by you and others.
- Follow all instructions and warnings dealing with your iPod photo.

Warning Electrical equipment may be hazardous if misused. Operation of this product, or similar products, must always be supervised by an adult. Do not allow children access to the interior of any electrical product and do not permit them to handle any cables.

Avoid Hearing Damage

Warning Permanent hearing loss may occur if earbuds or headphones are used at high volume. You can adapt over time to a higher volume of sound, which may sound normal but can be damaging to your hearing. Set your iPod photo volume to a safe level before that happens. If you experience ringing in your ears, reduce the volume or discontinue use of your iPod photo.

Do Not Use Headphones While Driving

Important: Use of headphones while operating a vehicle is not recommended and is illegal in some areas. Be careful and attentive while driving. Stop listening to your iPod photo if you find it disruptive or distracting while operating any type of vehicle or performing any other activity that requires your full attention.

Connectors and Ports

Never force a connector into a port. If the connector and port do not join with reasonable ease, they probably don't match. Make sure that the connector matches the port and that you have positioned the connector correctly in relation to the port.

Using the Power Adapter

- Use only the power adapter that came with your iPod photo. Adapters for other electronic devices may look similar, but they may damage your iPod photo.
- The only way to shut off power to your power adapter completely is to disconnect it from the power source.
- Always leave space around your power adapter. Do not use this equipment in a location where airflow around the power adapter is confined, such as a bookcase.

Safety and Cleaning 71

- When connecting or disconnecting your power adapter, always hold the power adapter by its sides. Keep fingers away from the metal part of the plug.
- Before connecting the FireWire cable to the power adapter, make sure there are no foreign objects inside the power adapter's FireWire port.
- The power adapter for your iPod photo is a high-voltage component and should not be opened for any reason, even when the iPod photo is off. If the power adapter needs service, see "Learning More, Service, and Support" on page 68.
- Never force a connector into the power adapter FireWire port. If the connector and
 port do not join with reasonable ease, they probably don't match. Make sure that the
 connector matches the port and that you have positioned the connector correctly in
 relation to the port.

About Operating and Storage Temperatures

- Operate your iPod photo in a place where the temperature is always between 0° and 35° C (32° to 95° F).
- Store your iPod photo in a place where the temperature is always between -20° and 45° C (-4° to 113° F). Don't leave iPod photo in your car, since temperatures in parked cars can exceed this range.
- iPod photo play time may temporarily shorten in low-temperature conditions.
- When you're using your iPod photo or charging the battery, it is normal for the bottom of the case to get warm. The bottom of the iPod photo case functions as a cooling surface that transfers heat from inside the unit to the cooler air outside.

Avoid Wet Locations

Warning To reduce the chance of shock or injury, do not use your iPod photo in or near water or wet locations.

- Keep your iPod photo and power adapter away from sources of liquids, such as drinks, washbasins, bathtubs, shower stalls, and so on.
- Protect your iPod photo and the power adapter from direct sunlight and rain or other moisture
- Take care not to spill any food or liquid on iPod photo or its power adapter. If you do, unplug iPod photo before cleaning up the spill.

In case of a spill, you may have to send your equipment to Apple for service. See "Learning More, Service, and Support" on page 68.

Do Not Make Repairs Yourself

Warning Do not attempt to open your iPod photo or power adapter, disassemble it, or remove the battery. You run the risk of electric shock and voiding the limited warranty. No user-serviceable parts are inside.

For service, see "Learning More, Service, and Support" on page 68.

Safety and Cleaning 73

Cleaning

Follow these general rules when cleaning the outside of your iPod photo and its components:

- Make sure your iPod photo is unplugged.
- Use a damp, soft, lint-free cloth. Avoid getting moisture in openings.
- Don't use aerosol sprays, solvents, alcohol, or abrasives.

About Handling

Your iPod photo may be damaged by improper storage or handling. Be careful not to drop your iPod photo when playing or transporting the device.

Communications Regulation Information

FCC Compliance Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See instructions if interference to radio or television reception is suspected.

Radio and Television Interference

This computer equipment generates, uses, and can radiate radio-frequency energy. If it is not installed and used properly—that is, in strict accordance with Apple's instructions—it may cause interference with radio and television reception.

This equipment has been tested and found to comply with the limits for a Class B digital device in accordance with the specifications in Part 15 of FCC rules. These specifications are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation.

You can determine whether your computer system is causing interference by turning it off. If the interference stops, it was probably caused by the computer or one of the peripheral devices.

If your computer system does cause interference to radio or television reception, try to correct the interference by using one or more of the following measures:

- Turn the television or radio antenna until the interference stops.
- Move the computer to one side or the other of the television or radio.
- Move the computer farther away from the television or radio.
- Plug the computer in to an outlet that is on a different circuit from the television or radio. (That is, make certain the computer and the television or radio are on circuits controlled by different circuit breakers or fuses.)

If necessary, consult an Apple-authorized service provider or Apple. See the service and support information that came with your Apple product. Or, consult an experienced radio/television technician for additional suggestions.

Important: Changes or modifications to this product not authorized by Apple Computer, Inc. could void the EMC compliance and negate your authority to operate the product.

This product was tested for EMC compliance under conditions that included the use of Apple peripheral devices and Apple shielded cables and connectors between system components. It is important that you use Apple peripheral devices and shielded cables and connectors between system components to reduce the possibility of causing interference to radios. television sets, and other electronic devices. You can obtain Apple peripheral devices and the proper shielded cables and connectors through an Apple Authorized Reseller. For non-Apple peripheral devices, contact the manufacturer or dealer for assistance. Responsible party (contact for FCC matters only): Apple Computer, Inc. Product Compliance, 1 Infinite Loop M/S 26-A. Cupertino, CA 95014-2084, 408-974-2000.

Industry Canada Statement

This Class B device meets all requirements of the Canadian interference-causing equipment regulations.

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada

VCCI Class B Statement

情報処理装置等電波障害自主規制について

この装置は、情報処理装置等電波障害自主規制協議会 (VCCI) の基準に基づくクラス B 情報技術装置です。この装置は家庭環境で使用されることを目的としていますが、この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。

取扱説明書に従って正しい取扱をしてください。

European Community

Complies with European Directives 72/23/EEC and 89/336/EEC.

Battery

Your iPod photo contains a battery. Dispose of iPod photo according to your local environmental laws and guidelines.

廢電池請回收

Nederlands: Gebruikte batterijen kunnen worden ingeleverd bij de chemokar of in een speciale batterijcontainer voor klein chemisch afval (kca) worden gedeponeerd.
