HEADLIGHT CONTROL

HEADLIGHT SWITCH

- Turn the headlight switch to the ∃DQE position to turn on the front parking, tail, license plate and instrument panel lights.
- Turn the headlight switch to the

 position to turn on the headlights. All other lights remain on.

AUTOMATIC HEADLIGHT OPERATION (if so equipped)

The autolight system allows the headlights to be set so they turn on and off automatically. The autolight system can:

- Turn the headlights, front parking, tail, license plate and instrument panel lights automatically when it is dark.
- Turn off all lights when it is light.
- Keep all the lights on for 45 seconds after you turn the ignition switch to off and all doors are closed.

TO ACTIVATE THE AUTOLIGHT SYSTEM:

■ Turn the headlight switch to the **AUTO** position, then turn the ignition switch to ON.

TO DEACTIVATE THE AUTOLIGHT SYSTEM:

■ Turn the headlight switch to the OFF, EDGE or #O position.

FOG LIGHT SWITCH (if so equipped)

Note: The headlights must be on and the low beams selected for the fog lights to operate.

- Turn the switch to the ‡O position to turn on the fog lights.
- Turn the switch to the **OFF** position to turn off the fog lights.

WINDSHIELD WIPER/WASHER SWITCH

- The ignition switch must be in the ON position to activate the windshield wipers.
- Push the lever down to operate the windshield wipers.
- Switch operation includes:

Also, the intermittent operation speed varies in accordance with the vehicle speed. (For example, when the vehicle speed is high, the intermittent operation speed will be faster.)

Low speed – Wipers operate at a continuous low speed.

HI High speed – Wipers operate at a continuous high speed.

Mist – Lift the lever up for one sweep operation of the wiper.

Wash - Pull the lever toward you. Wipers automatically wipe several times.

FOUR-WHEEL DRIVE (4WD) SHIFT SWITCH (if so equipped)

- This system provides 3 positions so the driver can select the desired drive mode according to driving conditions.
- 2WD Dry, paved roads.
- 4H Rocky, sandy or snow-covered roads.
- 4LO When maximum power and traction are required (steep grades, rocky, sandy or muddy roads).

OUTSIDE MIRROR CONTROL SWITCH

POWER FOLDING MIRRORS (if so equipped)

- Move the switch 01 to select the left or right mirror.
- Adjust each mirror to the desired position using the switch 02.
- Push the switch 03 to fold both mirrors in or out.

E-LOCK SWITCH (if so equipped)

The Electronic Locking Rear Differential (E-Lock) system can help provide added traction if the vehicle is stuck or becoming stuck.

To activate the system:

- The 4WD switch must be in the 4LO position (4-wheel drive vehicles),
- The vehicle must be stopped or moving at 4 mph or less, and
- The E-Lock system switch must be turned on.

Once the vehicle is free, the system should be turned off.

CARGO LAMP SWITCH

- Push the switch down 01 to turn on the cargo lamp.
- The cargo lamp stays on for approximately 20 seconds when the ignition is turned off unless the switch is pushed to the off position.

TOW MODE SWITCH

Tow mode raises transmission shift points and should be used when pulling a heavy trailer or hauling a heavy load.

- Push the TOW MODE switch to activate tow mode. The indicator light on the TOW MODE switch illuminates when tow mode is selected.
- Push the TOW MODE switch again to turn tow mode off.
- Tow mode is automatically canceled when the key is turned off.

STEERING WHEEL SWITCHES FOR AUDIO CONTROL (if so equipped)

- Press the POWER button to turn the audio system on or off.
- To choose preset radio stations A, B, or C, CD, DVD AUX (if so equipped), press MODE repeatedly.
- \blacksquare The $^{\wedge}_{V}$ switch can be used to perform the following:
 - While in one of the preset radio station banks
 (A, B or C), push the [^]V switch for less than 1.5 seconds to change to a preset station.
 - Push and hold the [^]V switch for more than 1.5 seconds to seek the next or previous broadcasting station.
 - Push the ^{\(\)}
 o switch for less than 1.5 seconds while playing a CD to change programs on the CD.
 - If the vehicle is equipped with a CD changer, push and hold the \(\frac{\lambda}{\text{v}} \) switch for more than 1.5 seconds to change between CDs.
- Push the **VOL** control switch up or down to increase or decrease volume.

CRUISE CONTROL

- To activate the cruise control, push the **ON-OFF** switch. The indicator light in the instrument panel will illuminate.
- To set cruising speed, accelerate the vehicle to the desired speed, push the COAST/SET switch and release it. The SET indicator light in the instrument panel will illuminate.
- To reset at a faster cruising speed, push and hold the ACCEL/RES switch. When the vehicle attains the speed you desire, release the switch.
- To reset at a slower cruising speed, push and hold the COAST/SET switch. Release the switch when the vehicle slows to the desired speed.

- To resume a preset speed, push and release the ACCEL/RES switch. The vehicle returns to the last set cruising speed when the vehicle speed is over 25 MPH (40 km/h).
- To cancel cruise control, push the **CANCEL** switch or tap the brake pedal. The SET indicator light in the instrument panel will go out.
- To turn off cruise control, push the ON·OFF switch. Both the CRUISE indicator light and the SET indicator light in the instrument panel will go out.

REMOTE KEYLESS ENTRY SYSTEM (if so equipped)

LOCK DOORS

Press the habutton to lock all doors.

UNLOCK DOORS

Press the abutton once to unlock the driver's door only. Press the button again within 5 seconds to unlock all doors.

USING THE PANIC ALARM

Press and hold the ▶ button for longer than 0.5 seconds. The panic alarm will sound and the headlights will stay on for 25 seconds. The panic alarm stops when it has run for 25 seconds, or when any button is pressed on the keyfob.

SILENCING THE HORN BEEP FEATURE

For vehicles without Navigation system:

- \blacksquare To deactivate: Press and hold the \bigcap and \bigcap buttons for at least 2 seconds.
- \blacksquare To activate: Press and hold the \bigcap and \bigcap buttons for at least 2 seconds.

For vehicles with Navigation system:

- Refer to the "Display screen, heater, air conditioner and audio" section in your Owner's Manual for the procedure.
- If you change the horn beep feature with the keyfob, the display screen will not show the current mode and cannot be used to change the mode. Use the keyfob to return to the previous mode and re-enable the display screen control.

CHILD SAFETY DOOR LOCKS (Crew Cab models only)

You'll find the safety lock levers on the edge of the rear doors. When in the **LOCK** position, the rear door can only be opened from the outside.

CONTROL PANEL DISPLAY WITH NAVIGATION SYSTEM (if so equipped)

TRIP BUTTON

When the **TRIP** button is pressed, the following modes will display on the screen:

- Warning messages (if there are any)
- TRIP 1 (Elapsed Time, Driving Distance, Average Speed)
- TRIP 2 (Elapsed Time, Driving Distance, Average Speed)
- FUEL ECONOMY (Average Fuel Economy, Distance to Empty)
- MAINTENANCE (Engine Oil, Tire Rotation)
- OFF

MAINTENANCE ITEMS

You can set the engine oil and the tire rotation interval. To display the setting of the maintenance interval, select the **ENGINE OIL** or **TIRE ROTATION** key using the joystick and press the **ENTER** button.

To set the maintenance interval, select the **MAINTENANCE SCHEDULE** key by using the joystick and pushing the joystick to the right or left. To reset the maintenance interval, select the **RESET** key using the joystick and press the **ENTER** button.

CLOCK SET/ADJUSTMENT

The clock on the display screen can be adjusted using the joystick by the following procedure:

- First select SYSTEM SETTINGS from the SETTINGS menu on the display screen.
- Next select CLOCK to enter the CLOCK SETTINGS mode.
- Then select the **HOURS** or **MINUTES** key and hold the joystick left or right to adjust the time. After the desired time is shown on the display screen, press the **BACK** button to store.

Refer to both the Navigation System Owner's Manual and your Owner's Manual for additional information.

HIGH UTILITY BED AND UTILI-TRACK™ CHANNEL SYSTEM (if so equipped)

The Utili-track™ channel system allows you to move tie-down clamps in the bed to the best location to secure a load.

■ The tie-down cleats must be installed so the clamp is properly seated in the notches in the rail. If the tie-down cleat is not seated in the

AUTOMATIC CLIMATE CONTROL

01 AUTO BUTTON

- Press the AUTO button 01 . Turn the driver's side temperature control dial 02 to the desired temperature. This will allow the fan speed, air flow distribution and temperature to be automatically maintained.
- Press the AUTO button a second time to turn the passenger's side temperature controls on or off. This will allow the passenger's side temperature to be adjusted independently from driver's side control.
- When AUTO is pressed, AUTO will be displayed. When AUTO is pressed a second time, **DUAL** will be displayed.

02 DRIVER'S SIDE TEMPERATURE CONTROL DIAL

Turn the driver's temperature control dial left for cold air or right for hot air.

03 PASSENGER'S SIDE TEMPERATURE CONTROL DIAL

Turn the passenger's temperature control dial left for cold air or right for hot air.

AIR FLOW MODE CONTROL BUTTON 04

Press **MODE** button repeatedly to scroll through the following air flow outlets:

- ئز Air flows from the center and side vents.
- ئز, Air flows from the center, side, and foot vents.
- نر. Air flows mainly from the foot vents.
- # Air flows from the defroster and foot vents.
- W Air flows mainly from the defroster vents.

05 **FAN SPEED CONTROL DIAL**

Turn the fan speed control dial \$\$ to the left (slower) or right (faster) to manually control fan speed. Press AUTO to automatically control fan speed.

06 DEFROSTING/DEFOGGING FRONT AND SIDE WINDOWS

- Press the defroster control button to turn the system on. The A/C automatically turns on when the defroster mode is selected.
- Turn the driver's side temperature control dial left or right to set the desired temperature.
- To set the defroster on high, turn the fan speed dial all the way to the right.

07 DEFROSTING/DEFOGGING REAR WINDOW AND (if so equipped) OUTSIDE **HEATED MIRROR**

Push the rear window defroster switch m on. Push the switch again to manually turn the defroster off. This function automatically turns off in approximately 15 minutes.

80

A/C ON/OFF BUTTON
Press the A/C button to manually turn the A/C on or off.

09 AIR RECIRCULATION BUTTON

- Press the air recirculation button to recirculate air inside the vehicle.
- Press the air recirculation button <a>ca> again to turn air recirculation off.
- The air recirculation mode cannot be selected if the air flow control dial is in the defrost position .

FM/AM/SAT* RADIO WITH CD CHANGER (if so equipped)

01 SEEK/TRACK BUTTON

- To scan quickly through each broadcasting station, press the SEEK/TRACK button.
- To skip from one track to another on a CD, press the SEEK/TRACK button. Each time the button is pressed, the CD will advance or skip back one track.

02 TUNE/FOLDER • CAT BUTTON

To manually tune the radio, press the **TUNE/FOLDER • CAT** button. If playing a CD that is formatted with MP3 folders, press the **TUNE/FOLDER • CAT** button to scroll through the folder.

03 PRESET A-B-C BUTTON

Press the **PRESET A·B·C** button until you reach the desired setting. The radio is equipped with three separate banks, each with six station presets. You may store any combination of AM, FM or SAT* radio presets on each bank.

04 REAR ON-OFF BUTTON

To turn rear audio controls on, press the **REAR ON-OFF** button. Press again to turn the rear controller off.

05 SPEAKER CONTROL BUTTON

Press this button to turn the rear speakers off and headphones on. Press this button again to turn the rear seat speakers back on and headphones off.

06 LOAD BUTTON

LOAD A SINGLE DISC – Press the **LOAD** button for less than 1.5 seconds. Select the loading slot by pressing the CD select button (1-6), then insert the CD.

LOAD UP TO 6 DISCS - Press and hold the **LOAD** button for more than 1.5 seconds. The slot numbers (1-6) will illuminate on the display when CDs are loaded into the changer.

07 STATION AND CD SELECT BUTTONS

To store a radio station in a preset, you must first select A, B, or C memory bank by pressing the **PRESET A·B·C** button and tuning to the desired AM, FM or SAT* station. Then, press and hold the desired station select button for at least 2 seconds. When the preset indicator illuminates, a beep will sound, indicating memorization is complete. To retrieve a previously set station, select the memory bank where the preset was set, then press the corresponding station select button.

^{*} SAT presets are only available on SAT equipped vehicles.

AUTOMATIC DRIVER POSITIONER (if so equipped)

The automatic driver positioner system has two features:

- Memory storage function.
- Entry/exit function.

MEMORY STORAGE FUNCTION

Two positions for the driver's seat, accelerator and brake pedals, and outside mirrors can be stored in the automatic driver positioner memory. Follow these procedures to set driver preferences.

SET THE DESIRED POSITIONING

- 1. Set the automatic transmission lever to the P (Park) position.
- Turn the ignition on and adjust the driver's seat, accelerator and brake pedals, and outside mirrors to the desired positions.
- Press the SET (memory) button and within 5 seconds press the position button (1 or 2) for at least 1 second until the indicator light illuminates. The position is now stored in memory.

LINK TO KEYFOB

- Within 5 seconds of setting the memory position (indicator light is on and ignition is on), press the button on the remote.
- A keyfob can be linked to each memory button.
- If memory positioning is re-set to a new location, the keyfob automatically re-links.

RECALLING A MEMORY SETTING FROM THE MEMORY PAD

Set the automatic transmission lever to the P (Park) position, then:

- Within 45 seconds of opening the driver's door, push the memory switch (1 or 2) fully for at least 1 second, or
- Turn the ignition switch to the ON position and push the memory switch (1 or 2) fully for at least 1 second.

FROM THE KEYFOB

■ If properly linked, operation of the button will automatically return the driver's seat, accelerator and brake pedals, and outside mirrors to the memorized position.

ENTRY/EXIT FUNCTION

The driver's seat automatically moves to allow the driver to get into and out of the driver's seat more easily. The driver's seat slides backward when:

- The driver's door is opened with the key turned to LOCK.
- The key is turned from ACC to LOCK with the driver's door open and the automatic transmission lever is in the P (Park) position.

The driver's seat returns to the previous position when:

- The key is inserted into the ignition switch.
- The driver's door is closed with the key turned to LOCK.
- The key is turned from ACC to ON while the automatic transmission lever is in the P (Park) position.

REAR POWER WINDOW (Crew Cab models only)

- To open the rear power window, push and hold the switch in the DOWN position.
- To close the rear power window, push and hold the switch in the UP position.
- To stop the opening or closing function at any time, simply release the switch.

ADJUSTABLE ACCELERATOR AND BRAKE PEDALS (if so equipped)

The accelerator and brake pedals can be adjusted for your driving comfort.

- Adjust the pedals when the automatic transmission lever is in P (Park).
- Push **1** un move the position of the pedals forward.
- Push **02** to move the position of the pedals backward.

REAR SONAR OFF SWITCH (if so equipped)

When backing up, this system will beep to alert you to obstacles within 6 ft. of the rear bumper. The system beeps faster as the vehicle gets closer to the obstacle. A continuous tone sounds when an obstacle is less than 10 inches away from the bumper. Turn the system off by pushing the rear sonar system **OFF** switch. Push the switch again to enable the system. The system will automatically reset the next time the ignition switch is turned on.

SUNROOF CONTROLS (if so equipped)

TILTING THE SUNROOF

- Push the tilt switch to the UP position of to tilt the sunroof up.
- Push the tilt switch to the DOWN position 02 to tilt the sunroof down.

SLIDING THE SUNROOF

- Push the switch toward the OPEN position on to fully open the sunroof.
- Push the switch toward the **CLOSE** position **04** to fully close the sunroof.
- Push the switch in any direction while the sunroof is sliding open or closed to stop the sunroof in the desired position.

01

MANUAL SHIFT MODE (if so equipped)

When the MANUAL SHIFT MODE button is pressed while driving, the transmission enters the manual shift mode. Shift ranges can be selected manually. In the manual shift mode, the shift range is displayed on the position indicator in the meter. After pressing the MANUAL SHIFT MODE button, the position indicator first displays **M4** (4th).

WHEN SHIFTING UP

Move the selector lever to the + (up) side. (Shifts to higher range.)

WHEN SHIFTING DOWN

Move the selector lever to the - (down) side. (Shifts to lower range.)

- The transmission will automatically downshift the gears. (For example, if you select the 3rd range, the transmission will shift down between the 3rd and 1st gears.)
- Moving the selector lever rapidly to the same side twice will shift the ranges in succession.
- Refer to your Owner's Manual for detailed information.

SEAT BELT WARNING LIGHT AND CHIME

■ The light and chime remind you to fasten your seat belts. The light illuminates whenever the ignition key is turned to the ON or START position and remains illuminated until the driver's seat belt is fastened. At the same time, the chime sounds for about 6 seconds unless the driver's seat belt is securely fastened.

■ The seat belt warning light may also illuminate if the front passenger's seat is occupied For 5 seconds after the ignition switch is in the ON position, the system does not activate the warning light for the front passenger.

Refer to the Owner's Manual for detailed information regarding seat belt usage.

FRONT-PASSENGER AIR BAG STATUS LIGHT

This vehicle is equipped with the Nissan Advanced Air Bag system. Under some conditions, depending on pressure detected on the passenger seat and how the seat belt is used, the front-passenger air bag is designed to automatically turn **OFF**. When the front-passenger air bag is **OFF**, the front-passenger air bag status light will illuminate*. For example:

- When the system detects that the front-passenger's seat is occupied by a small adult, child or child restraint as outlined in the Owner's Manual, the ※ will illuminate to indicate that the front-passenger air bag is OFF and will not inflate in a crash.
- When the front-passenger's seat is occupied and the passenger meets the conditions outlined in the Owner's Manual, the ※ will not illuminate to indicate that the front-passenger air bag is operational.

*When the system detects that the front-passenger's seat is unoccupied, the passenger air bag status light will not illuminate even though the front-passenger air bag is OFF.

Refer to the Owner's Manual for detailed information regarding the Nissan Advanced Air Bag System.

TIRE PRESSURE MONITORING SYSTEM

This system monitors tire pressure. Please remember, this system does not detect a sudden drop in tire pressure (for example, a blowout while driving). It also does not monitor the air pressure in the spare tire.

Tire pressure is affected by temperature. Low outside temperature

causes lower tire pressure. This may cause the low tire pressure warning light to illuminate.

If the low tire pressure warning light illuminates, check the tire pressure in all four tires. To turn the low tire pressure warning light off, adjust the low tire pressure to the recommended COLD tire pressure shown on the Tire and Loading Information label located in the driver's door opening.

If TPMS is not functioning properly, the low tire pressure warning light will flash for approximately 60 seconds when the key is turned on. After 60 seconds, the light will remain on. Have the system checked by a NISSAN dealer.

FRONT SEAT ADJUSTMENTS

With manual seats (if so equipped):

- Pull up on the lever under the front of the seat and slide backward or forward: release.
- Lift the lever of on the side of the seat to adjust your seatback backward or forward; release when you have found a comfortable angle and the seat belt fits properly.

With power seats (if so equipped):

- Move the control 02 forward or backward to adjust the seat cushion forward or backward.
- Pull up on the control 2 to raise the seat cushion; press down to lower the cushion.
- Push the switch 03 forward to move the seatback forward; push it back to move the seatback backward.

LUMBAR SUPPORT (if so equipped):

Your driver's seat has a lumbar support; adjust it by moving the lever 04 up or down.

FOLDING THE REAR BENCH SEAT

To fold the rear bench seat for storage capacity behind the front seats, or to remove the jacking tools from the storage area:

- Lift up on the lever o1, located on the side of the seat, while lifting the front of the seat cushion up.
- Fold the bottom of the seat cushion toward the back of the vehicle until it locks in place.
- Repeat this process to raise and secure the seat cushion on the other side of the vehicle for maximum storage capacity.

notches, it will not be flush with the rail and cannot be properly tightened. The bolt in the center of the cleat must be tightened hand tight (20 – 40 inch pounds).

- Check the tightness of the tie-down cleat periodically during a trip to make sure the center bolt has not become loose.
- The channel end stoppers can be used to help prevent cargo from sliding or shifting off the end of the truck bed. They must be installed so they are properly seated in the detents in the channel.
- Refer to your Owner's Manual for loading limits and tie-down recommendations.

WIDE OPEN DOORS (King Cab models only)

The wide open doors open 168 degrees to allow access to the rear of the cab.

- Open the driver's or passenger's door.
- From the outside, pull the door handle toward you.

- From the inside, pull the inside door handle toward you. The door will unlock automatically.
- Open the door to the desired position.

Do not open the driver's side wide open door while refueling or damage may result to the fuel filler door or the wide open door.

This easy-to-use Quick Reference Guide is intended to help you more fully appreciate some of the unique features and functions of your new vehicle. However, it is not intended to replace your Owner's Manual. The Owner's Manual contains more detailed information to help you better understand the important safety warnings, features, operation, and maintenance of your vehicle.
