MILITARY AND GOVERNMENT ALERTING SYSTEMS

Restricted Area

The verbal alert announcement system designed to alert military personnel of a restricted area violation

The Wheelock Personnel Alert System has been developed as a solution to minimize terrorist threats to naval piers and bases. The Personnel Alert System is an integrated emergency voice alert system that notifies naval personnel in the event of an emergency. This system has been designed specifically to meet the needs of naval bases where there is a need to broadcast messages in an outdoor environment.

A typical system can broadcast an intimidating warning in any language to ward off a potential threat via a powerful speaker cluster consisting of (4) four 30 watt weatherproof horns. The message can be initiated by pushing an alert button located in a guard shack. Here is an example of three messages:

- #1 "Small craft security violation on pier 1.
 You have entered a federal restricted area, immediately exit the area, the use of force is authorized if you do not immediately exit the area. Repel boarders.
 Repel boarders on pier 1."
- #2 "Personnel security violation pier 1 all hands stand fast, personnel security violation on pier 1, all hands stand fast. Personnel security violation on pier 1, repel boarders, repel boarders.

Approx. Dimensions 15" H x 36" Diameter

#3 "All hands standby for colors."

In addition, the system can be designed to meet your specific requirements depending on the type of application. Technical and applications support is available to assist you with designing the right system for your base.
